

**PowerLite® 450W/460
Multimedia Projector**

User's Guide

Important Safety Information

WARNING: Never look into the projector lens when the lamp is turned on; the bright light can damage your eyes. Never let children look into the lens when it is on. Never open any cover on the projector, except the lamp and filter covers. Dangerous electrical voltages inside the projector can severely injure you. Except as specifically explained in this *User's Guide*, do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

WARNING: The projector and its accessories come packaged in plastic bags. Keep plastic bags away from small children to avoid any risk of suffocation.

Caution: When you replace the lamp, never touch the new lamp with your bare hands; the invisible residue left by the oil on your hands may shorten the lamp life. Use a cloth or glove to handle the new lamp.

Welcome

The PowerLite® 450W/460 is an easy-to-use, ultra short-throw projector. Designed for wall mounting, the projector can be placed above a screen, interactive whiteboard, or other surface and project an image up to 80 inches (207 cm) wide.

The projector offers up to 2500 lumens (PowerLite 450W) or 3000 lumens (PowerLite 460) of white and color light output (brightness). It also provides a native XGA (PowerLite 460) or WXGA (PowerLite 450W) resolution. You can connect it to a wide range of computers, interactive whiteboards, and video sources. You can also project from a USB storage device or over your network. With the optional wireless LAN module, you can project over a wireless network.

- Included wall bracket (setting plate) and built-in slide plate for easy and inexpensive wall mounting
- 8.5-second startup time and Instant Off® feature for fast setup and shut down
- Closed captioning
- USB projection for quick and easy connection
- 10 Watt speaker and microphone input
- Security features including password, user's logo, and the ability to lock the projector buttons
- Project up to four different images from one computer
- Project only the PowerPoint® slide images while viewing handout notes and controls on the computer screen

Using Your Documentation

This manual contains all the information you need to set up and use your projector. Please follow these guidelines as you read through it:

- **Warnings** must be followed carefully to avoid bodily injury.
- **Cautions** must be observed to avoid damage to your equipment.
- **Notes** contain important information about your projector.
- **Tips** contain additional projection hints.

Getting More Information

Need quick steps for setting up your projector? Here's where you can look for help:

- ***Installation Guide***
Provides detailed instructions on installing the projector using the wall mounting hardware included in the box.
- ***Quick Setup sheet***
Provides information for connecting the projector directly to your equipment or through a network, using the remote control, and solving display problems.
- ***EasyMP Network Projection Operation Guide***
Provides detailed instructions on using your projector in a network environment (PDF installed along with this manual from the projector CD).
- ***EasyMP Monitor Operation Guide***
Provides instructions on using the EasyMP Monitor software to manage projectors on a network (PDF installed along with this manual from the projector CD).
- ***Built-in help system***
Provides assistance for common problems. Available from the ? Help button on the projector or the remote control. See page 110 for details.
- ***epson.com/support***
Download FAQs and e-mail your questions to Epson support.

- **PrivateLine® support**

If you still need help after checking this *User's Guide* and the sources listed in this section, you can use the Epson PrivateLine Support service to get help fast. Call (800) 637-7661 and enter the PIN on the PrivateLine card. Or take advantage of Epson's automated support services 24 hours a day. See page 124 for more information.

Registration and Warranty

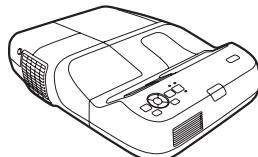

Your projector comes with a basic warranty that lets you project with confidence. For details, see the warranty brochure included with your projector.

In addition, Epson offers free Extra CareSM Road Service. In the unlikely event of an equipment failure, you won't have to wait for your unit to be repaired. Instead, Epson will ship you a replacement unit anywhere in the United States or Canada. See the brochure included with your projector for details.

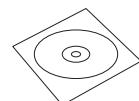

You can register using the included CD, or you can register online at epson.com/webreg. Registering also lets you receive special updates on new accessories, products, and service.

Unpacking the Projector

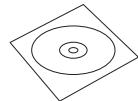

After unpacking the projector and mounting hardware, make sure you have all these parts:

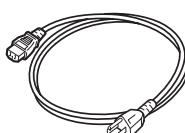

Projector

PDF manuals and
registration CD-ROM

Projector software
CD-ROM

Power cord

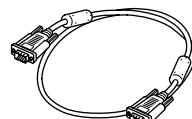

Remote control

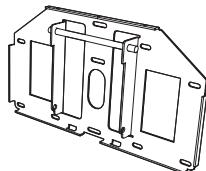

2 AA batteries
(for remote control)

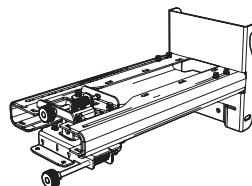

Security sticker

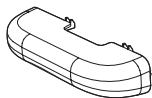

VGA computer cable

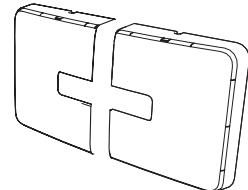

Wall plate

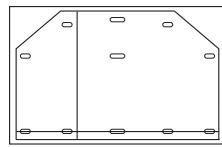

Wall mount (setting plate)

End cap

Wall plate cover

Installation template

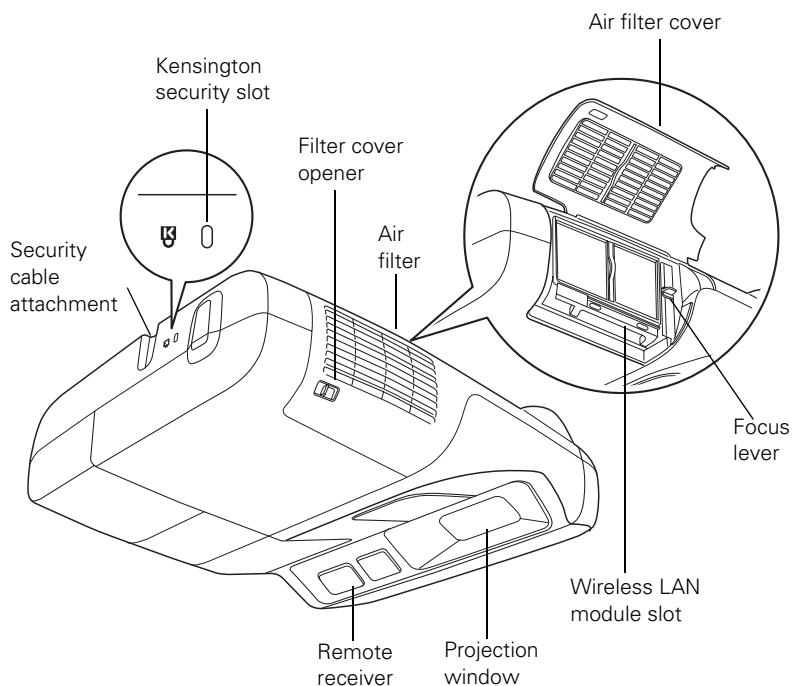

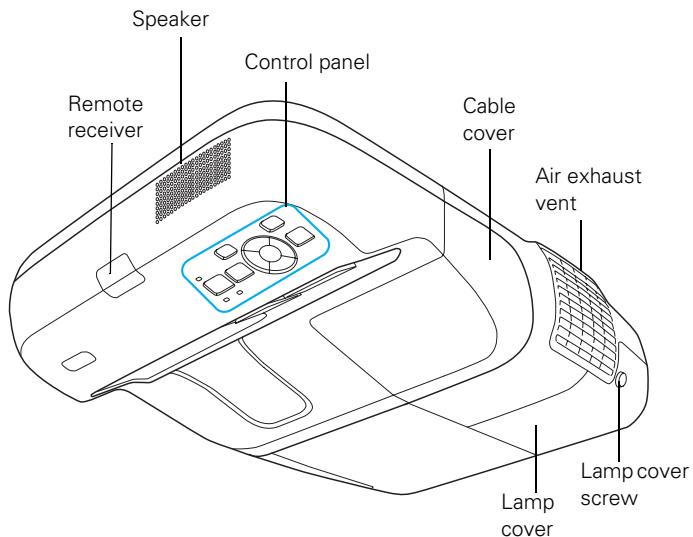

Hex wrenches

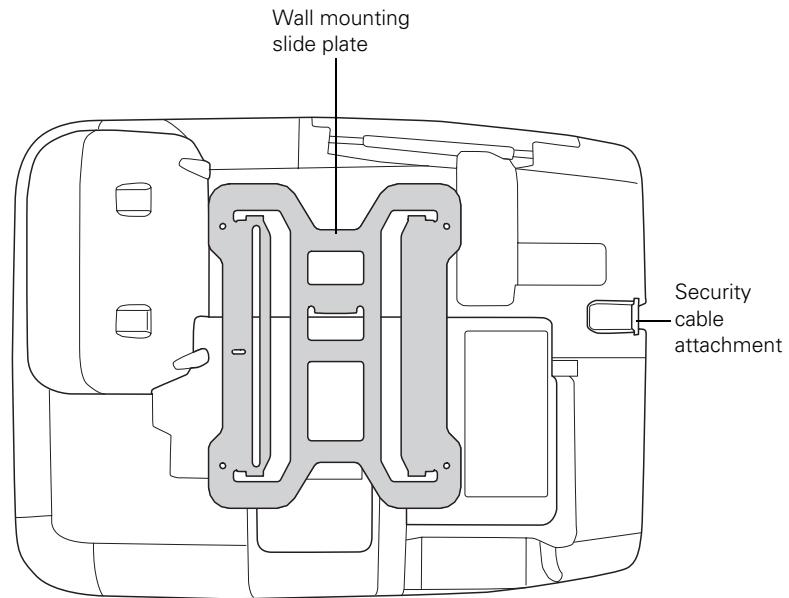

Bolts

See the *Installation Guide* for instructions on mounting the projector on a wall. Save all packaging in case you need to ship the projector. Always use the original packaging (or the equivalent) when you need to send the projector to another location. See page 107 for transportation instructions.

Projector Dimensions

Use the dimensions below to guide you in placing or installing the projector.

With slide plate

Without slide plate

Additional Components

Depending on how you plan to use the projector, you may need additional components:

- To receive a component video signal from a DVD player or other video device, you'll need a component-to-VGA video cable. One may be included with your video equipment, or you can purchase the ELPKC19 cable from Epson. See "Optional Accessories" below.
- To receive an S-Video signal, you'll need an S-Video cable. One may be included with your video equipment, or you can purchase one from Epson. See "Optional Accessories" below.
- To receive an audio signal, you'll need an RCA-type audio cable with two male plugs, or a stereo mini-jack audio adapter cable (with red and white jacks on one end).

Optional Accessories

To enhance your use of the projector, Epson offers the following optional accessories:

Product	Part number
Replacement lamp	V13H010L57
Replacement air filter set	V13H134A27
Wireless LAN module	V12H306P11
Quick Wireless Connection USB key	V12H005M05
Kensington security lock	ELPSL01
DC-06 document camera (ELPDC06) DC-10s document camera	V12H321001 ELPDC10S
Component-to-VGA video cable S-Video cable	ELPKC19 ELPSV01

You can purchase accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

1

Displaying and Adjusting the Image

Whether you're projecting from a computer or video equipment, you need to follow some basic steps to display your image on the screen.

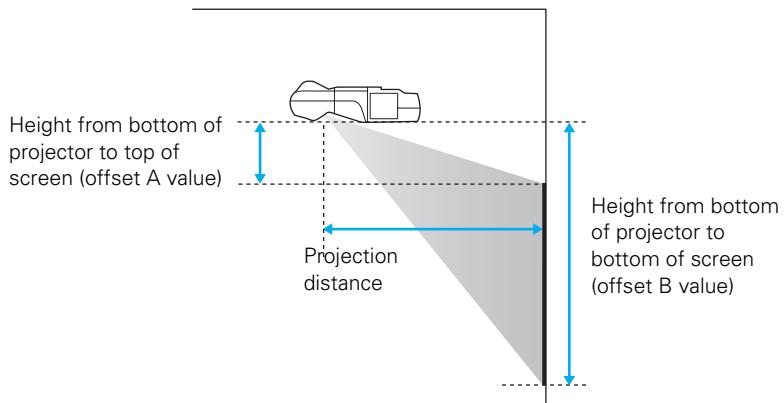

Follow the guidelines in this chapter for:

- Positioning the projector
- Turning the projector on and off
- Selecting the image source
- Adjusting the image

Positioning the Projector

The projector lens should be between 18 to 30 inches (47 to 76 cm) from the screen. Use the illustrations and tables below to help you determine approximately how far to place it based on the screen size you're using and the aspect ratio of the image. Image size can vary depending on how you adjust the zoom and other settings.

You can also use the [Image Size Calculator](#) on the Epson website.

PowerLite 460 (4:3 aspect ratio)

Screen size (diagonal)	Projection distance Wide to Tele	Offset A	Offset B
63 inches (160 cm)	18 to 25 in. (47 to 63 cm)	3.7 to 12.3 in. (9 to 31 cm)	41.5 to 50.1 in. (105 to 127 cm)
70 inches (178 cm)	20 to 28 in. (52 to 71 cm)	4.3 to 13.9 in. (11 to 35 cm)	46.3 to 55.9 in. (118 to 142 cm)
80 inches (203 cm)	23 in. (60 cm)	5.2 in. (13 cm)	53.2 in. (135 cm)
90 inches (229 cm)	26 in. (67 cm)	6.1 in. (16 cm)	60.1 in. (153 cm)
102 inches (259 cm)	30 in. (76 cm)	7.2 in. (18 cm)	68.4 in. (174 cm)

PowerLite 460 (16:9 aspect ratio)

Screen size (diagonal)	Projection distance Wide to Tele	Offset A	Offset B
60 inches (152 cm)	19 to 26 in. (48 to 66 cm)	8.8 to 12.8 (22 to 33 cm)	38.2 to 52.1 in. (97 to 132 cm)
65 inches (165 cm)	21 to 28 in. (53 to 71 cm)	9.7 to 14.1 in. (25 to 36 cm)	41.6 to 56.6 in. (106 to 144 cm)
70 inches (178 cm)	22 in. (57 cm)	10.6 in. (27 cm)	44.9 in. (114 cm)
80 inches (203 cm)	26 in. (65 cm)	12.4 in. (32 cm)	51.6 in. (131 cm)
90 inches (229 cm)	29 in. (73 cm)	14.2 in. (36 cm)	58.3 in. (148 cm)
93 inches (236 cm)	30 in. (76 cm)	14.7 in. (37 cm)	60.3 in. (153 cm)

PowerLite 460 (16:10 aspect ratio)

Screen size (diagonal)	Projection distance Wide to Tele	Offset A	Offset B
60 inches (152 cm)	19 to 25 in. (47 to 64 cm)	6.9 to 12.4 in. (18 to 32 cm)	38.7 to 50.6 in. (98 to 129 cm)
70 inches (178 cm)	22 to 29 in. (55 to 75 cm)	8.4 to 14.8 in. (21 to 38 cm)	45.5 to 59.4 in. (116 to 151 cm)
80 inches (203 cm)	25 in. (63 cm)	9.9 in. (25 cm)	52.3 in. (133 cm)
90 inches (229 cm)	28 in. (71 cm)	11.4 in. (29 cm)	59.1 in. (150 cm)
96 inches (244 cm)	30 in. (76 cm)	12.3 (31 cm)	63.2 in. (160 cm)

PowerLite 450W (16:10 aspect ratio)

Screen size (diagonal)	Projection distance Wide to Tele	Offset A	Offset B
60 inches (152 cm)	19 to 25 in. (47 to 64 cm)	6.9 to 15.6 in. (18 to 40 cm)	38.7 to 47.4 in. (98 to 120 cm)
70 inches (178 cm)	22 to 29 in. (55 to 75 cm)	8.4 to 18.5 in. (21 to 47 cm)	45.5 to 55.6 in. (116 to 141 cm)
80 inches (203 cm)	25 in. (63 cm)	9.9 in. (25 cm)	52.3 in. (133 cm)
90 inches (229 cm)	28 in. (71 cm)	11.4 in. (29 cm)	59.1 in. (150 cm)
96 inches (244 cm)	30 in. (76 cm)	12.3 in. (31 cm)	63.2 in. (160 cm)

PowerLite 450W (4:3 aspect ratio)

Screen size (diagonal)	Projection distance Wide to Tele	Offset A	Offset B
55 inches (140 cm)	19 to 26 in. (49 to 66 cm)	7.3 to 16.3 in. (18 to 41 cm)	40.3 to 49.3 in. (102 to 125 cm)
60 inches (152 cm)	21 to 29 in. (53 to 73 cm)	8.1 to 17.9 in. (21 to 46 cm)	44.1 to 53.9 in. (112 to 137 cm)
70 inches (178 cm)	25 in. (63 cm)	9.8 in. (25 cm)	51.8 in. (132 cm)
80 inches (203 cm)	28 in. (72 cm)	11.5 in. (29 cm)	59.5 in. (151 cm)
85 inches (216 cm)	30 in. (76 cm)	12.3 in. (31 cm)	63.3 in. (161 cm)

PowerLite 450W (16:9 aspect ratio)

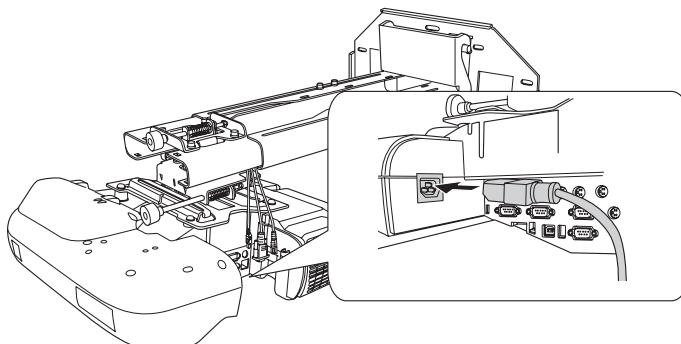

Screen size (diagonal)	Projection distance Wide to Tele	Offset A	Offset B
60 inches (152 cm)	19 to 26 in. (48 to 66 cm)	8.8 to 16.1 in. (22 to 41 cm)	38.2 to 48.8 in. (97 to 124 cm)
65 inches (165 cm)	21 to 28 in. (53 to 71 cm)	9.7 to 17.6 in. (25 to 45 cm)	41.6 to 53 in. (106 to 135 cm)
70 inches (178 cm)	22 in. (57 cm)	10.6 in. (27 cm)	44.9 in. (114 cm)
80 inches (203 cm)	26 in. (65 cm)	12.4 in. (32 cm)	51.6 in. (131 cm)
90 inches (229 cm)	29 in. (73 cm)	14.2 in. (36 cm)	58.3 in. (148 cm)
93 inches (236 cm)	30 in. (76 cm)	14.7 in. (37 cm)	60.3 in. (153 cm)

Turning the Projector On and Off

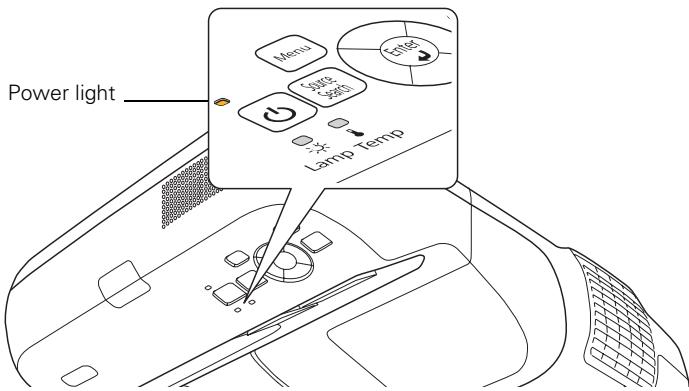

Turn on any connected computer or video equipment before starting the projector so it can automatically detect and display the image source. If you turn on the projector first, or have multiple pieces of connected equipment, you may have to select the image source manually (see page 28).

Follow these steps to turn on the projector:

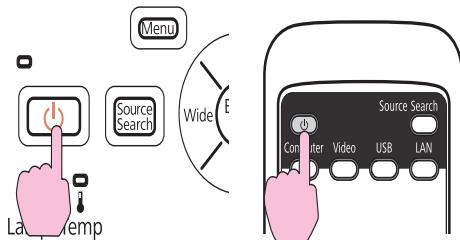

1. Make sure the power cord is connected and the projector is plugged into an electrical outlet.

The \odot power light should be orange.

2. Press the \odot power button on the projector or on the remote control.

warning

Never look into the lens when the lamp is on. This can damage your eyes, and is especially dangerous for children.

The projector beeps once and the \odot power light flashes green as the projector warms up, then an image begins to appear. When the \odot power light stops flashing and remains green, the projector is ready for use.

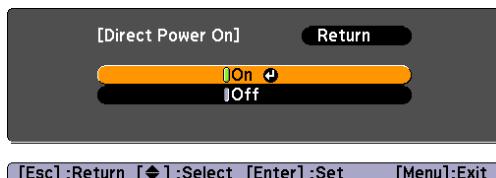

3. If you are prompted to enter a password, see page 70.

Using the Direct Power On Function

The Direct Power On function enables faster setup. The projector starts up automatically when you plug it in or turn it on with a wall switch. You don't have to press the \odot power button.

Follow these steps to enable Direct Power On:

1. Press the **Menu** button on the remote control or projector, then select the **Extended** menu and press **Enter**.
2. Choose **Operation** and press **Enter**.
3. Choose **Direct Power On** and press **Enter**.

4. Highlight **On** and press **Enter**.
5. Press **Menu** to exit. The setting will take effect the next time you plug the projector into a power outlet or turn it on with a wall switch.

Shutting Down the Projector

This projector incorporates Instant Off technology. To turn it off, you can press its \odot power button as described below, unplug it, or turn off a power switch that supplies power to the projector. You don't have to wait for the projector to cool down first.

1. To turn off the projector, press the \odot power button on the remote control or projector.

You see a confirmation message.
(If you don't want to turn it off, press any other button.)

2. Press the \odot power button again. The projection lamp turns off and the projector beeps twice. You can then unplug the power cord.

note

If a power outage occurs when Direct Power On is enabled and the projector is plugged in, the projector will restart when the power is restored.

note

Lamp life will vary depending upon mode selected, environmental conditions, and usage.

Turn off this product when not in use to prolong the life of the projector.

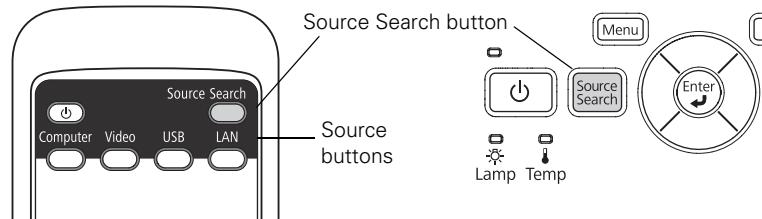

You can set the projector to automatically turn off the lamp and enter "sleep mode" when it has not received any signals for 1 to 30 minutes (see page 68). This conserves electricity, cools the projector, and extends the life of the lamp. If you want to start projecting again, press the \odot power button.

If you want to turn the projector on again, make sure the orange \odot power light is not flashing, then press the \odot power button.

Selecting an Image Source

You may need to select the image source if you have multiple image sources connected to the projector (such as a computer or DVD player). Selecting the image source lets you switch between images input from different pieces of connected equipment.

If you don't see the image you want, press the **Source Search** button on the remote control or the projector until you see the image you want to project. Or, press one of the Source buttons on the remote control (**Computer**, **Video**, **USB**, or **LAN**).

If you still can't see an image or can't project the same image that is on your notebook or computer screen, see page 114 for solutions.

Select **USB** to project from a USB device or **LAN** to project over a network. See page 40 for instructions.

Adjusting the Image

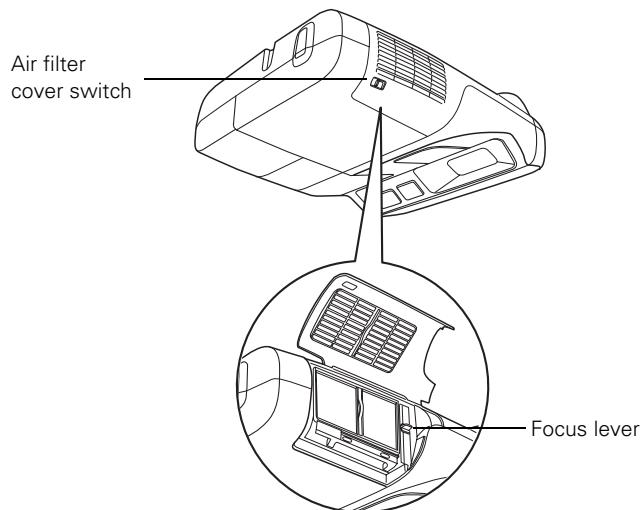

Once you see your image, you may need to make certain adjustments:

- To focus the image, see page 29.
- To quickly adjust the color, brightness, or contrast, see page 30.
- To change the image aspect ratio, see page 31.
- If you need to fine-tune the image and/or sound, see "Fine-Tuning the Projector" on page 59.

Focusing the Image

Focusing the projector is part of the installation process. If necessary, you can re-adjust the focus at any time using the focus lever next to the air filter on the side of the projector.

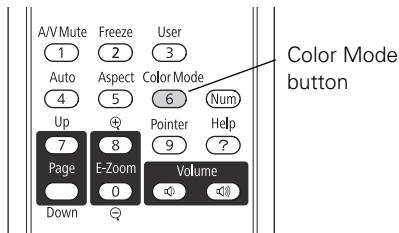

1. Slide the switch to open the air filter cover on the side of the projector.
2. Raise or lower the focus lever to sharpen the image.

Selecting the Color Mode

The Color Mode adjusts the brightness, contrast, and color for various common viewing environments. Use this setting to quickly obtain a good picture.

Press the **Color Mode** button on the remote control to select an option. Press it until the option you want is projected in the upper right corner.

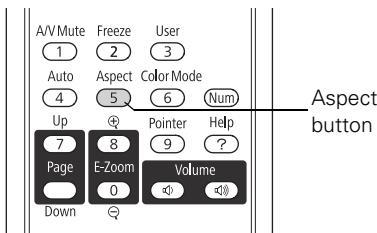

Select from one of these Color Mode options:

- **Dynamic:** Brightest mode; for video games or TV in a bright room.
- **Presentation:** For color presentations in a bright room (default setting).
- **Theatre:** For natural-toned movies in a darkened room.
- **Photo:** For vivid, high-contrast still images in a bright room (only available when the source is set to LAN or USB.)
- **Sports:** For vivid TV images in a bright room (only available for component video, S-Video, or composite video sources).
- **sRGB:** Matches the color palette of standard sRGB computer displays.
- **Blackboard:** Projects accurate colors on a green chalkboard (adjusts the white point).
- **Whiteboard:** For computer presentations in a bright room with black-and white text and graphics.

Resizing Video Images

You can resize your images by changing the aspect (width to height) ratio (depending on your input signal).

Press the **Aspect** button on the remote control. Press the **Aspect** button repeatedly to cycle through the available options.

note

You cannot change the aspect ratio when displaying from a computer using the USB TypeB port or from a USB device using the USB source.

Select from one of these **Aspect** options:

PowerLite 460

- **4:3:** Displays images using the full projection area and maintains the aspect ratio of the image. Choose this setting to automatically resize the image and make the best use of the display area.
- **16:9:** Converts the aspect ratio of the image to 16:9. 4:3 ratio images are elongated horizontally to fit.

PowerLite 450W

- **Normal:** Displays images using the full projection area and maintains the aspect ratio of the image. Choose this setting to automatically resize the image and make the best use of the display area.
- **16:9:** Converts the aspect ratio of the image to 16:9. 4:3 ratio images are elongated horizontally to fit.
- **Full:** Displays images using the full width of the projection area, but does not retain the aspect ratio. 4:3 ratio images are elongated horizontally.
- **Zoom:** Displays images using the full width of the projection area and maintains the aspect ratio of the image. The image may be cut off on the top and bottom depending on its aspect ratio.

- **Native:** Displays images as is (aspect ratio and resolution are maintained). Black bands may appear or images may be cut off, depending on the resolution.

2 *Presenting With the Remote Control*

The projector includes a number of tools to enhance your presentation. All of them can be accessed using the remote control, which lets you operate the projector from anywhere in the room—up to 19.7 feet (6 meters) away.

This chapter covers:

- Using the remote control
- Controlling the picture and sound
- Displaying Patterns
- Operating your computer with the remote control
- Highlighting your presentation
- Presenting a slideshow from a USB device

note

If a button is stuck down for longer than 30 seconds, the remote control stops operating to conserve battery power. When you release the button, normal operation resumes.

Using the remote control under bright fluorescent lamps or in direct sunlight may affect projector response.

Using the Remote Control

Make sure batteries are installed as described on page 106. Follow these tips for using the remote control:

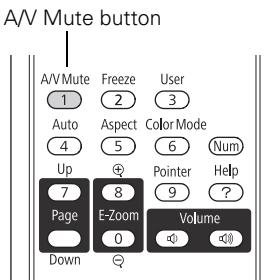

- Point the remote control at the projector or at the screen.
- Stand within 19.7 feet (6 meters) of the projector.
- Aim the remote control within 30° to the side of, or 15° above or below, the remote control receivers on the projector.

Controlling the Picture and Sound

You can use the remote control to temporarily turn off the picture and sound, freeze the action, zoom in on the picture, and adjust the volume.

Turning Off the Picture and Sound

Press the A/V Mute button on the remote control to turn off the image and sound, and darken your screen. This is useful if you want to temporarily re-direct your audience's attention without the distraction of a bright screen.

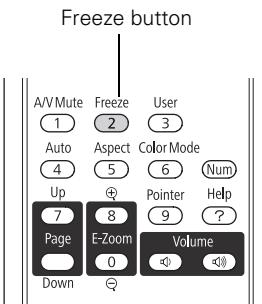

To turn the image and sound back on, press the button again.

You can create an image, such as a company logo or picture, to display on the screen whenever you press the A/V Mute button. (See page 71 for more information.)

Stopping Action

Press the Freeze button on the remote control to stop the action in your video or computer image. The image freezes but the sound continues.

To restart the action, press the Freeze button again.

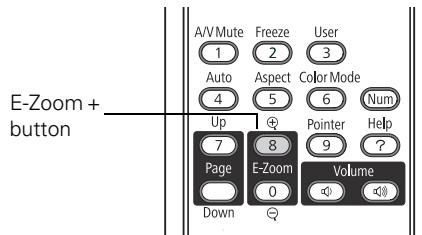

note

The Freeze function pauses the image, not the sound. Because the source continues to transmit signals, it will not resume at the same point.

Zooming In on Your Image

You can zoom in on a portion of the image using the E-Zoom buttons on the remote control.

1. Press the E-Zoom + button on the remote control.

note

You cannot use the Progressive feature (see page 63) while you are using E-Zoom.

You see a crosshair indicating the center of the zoom-in area.

2. Use the arrow (menu navigation) buttons to position the crosshair.
3. Continue pressing the E-Zoom + button to enlarge the selected area up to 4 times.

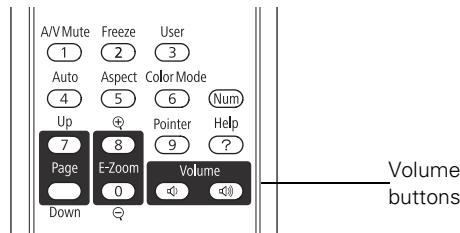

4. While the image is enlarged, you can:
 - Use the arrow buttons to move around the screen.
 - Press the E-Zoom – button to zoom out.
5. Press the ESC button to return the image to its original size.

Controlling the Volume

To change the volume on the projector, press the \triangleleft or \triangleright button on the remote control.

note

To temporarily shut off the sound and picture, press the A/V Mute button.

You can also adjust the volume using the projector's menu system. See page 65.

Displaying Patterns

You can display a test pattern or one of the following 4 patterns for use on a whiteboard or chalkboard:

Pattern 1

Pattern 2

Pattern 3

Pattern 4

1. Press the **Menu** button on the remote control, then select the **Settings** menu and press **Enter**.
2. Highlight **Pattern** and press **Enter**.
3. Highlight **Pattern Type** and select one of the patterns shown above, or chose **Test Pattern**. If you want to create your own pattern, choose **User Pattern**. See page 37 for more information.

4. Press **Enter** to select the pattern you want, then press **Esc**.
5. Choose **Pattern Display** to display the pattern.
6. Press **Esc** when you're finished displaying the pattern.

Assigning a Pattern to the User Button

You can assign any of the available patterns to the **User** button on the remote control, and then display it by simply pressing the **User** button.

1. In the Settings menu, select the **Pattern Type** as described on page 36.
2. Highlight **User Button** and press **Enter**.
3. Highlight **Pattern Display** and press **Enter**.
4. Press **Menu** to exit.

Creating Your Own Pattern

You can transfer any image from your computer or video source to the projector and then use it as a pattern. If you assign it to the **User** button as described above, you can display it any time you want by simply pressing the **User** button on the remote control.

Start by displaying the image you want to use from a computer or other source. Then follow these steps to capture the image and transfer it to the projector:

1. In the Settings menu, highlight **Pattern** and press **Enter**.
2. Select **User Pattern** and press **Enter**.
3. When you see a message asking if you want to use the current image as the pattern, select **Yes** and press **Enter**.
4. Press **Enter** again.
5. When you see a confirmation message, select **Yes** and press **Enter**. Saving the image may take a few moments. Do not use your projector, remote control, or video source while the logo is being saved.

note

When you choose an image for the user pattern, it erases any previously used image.

- When you see a message that saving is complete, press **Menu** to exit.

Operating Your Computer With the Remote Control

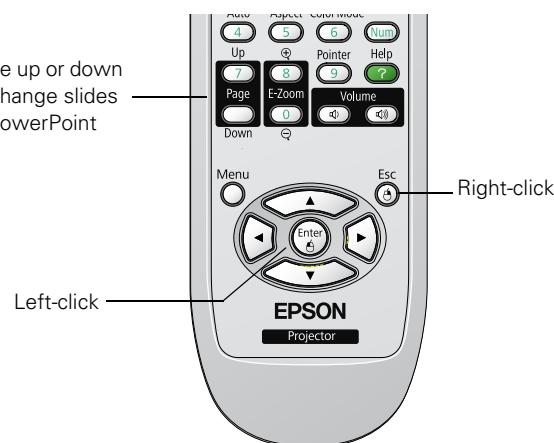

note

You can use the remote control as a wireless mouse only when projecting from the Computer1 or Computer2 ports.

You may need to select specific settings on your computer to use the remote control as a mouse. See your computer documentation for details.

You can use the remote control in place of your computer's mouse so you won't have to stand next to the computer to control the presentation.

Before you can use the remote control to operate your computer, you must connect a USB cable to the TypeB  (square) USB port on the projector (see page 44) and select **Wireless Mouse** as the **USB Type B** setting on the Extended menu (see page 67).

Then you can control your computer as follows:

- Use the remote control's **Page Up** or **Page Down** buttons to move through presentation slides.
- Use the arrow buttons to move the cursor on the screen.
- Press the **Enter** button once to left-click, or twice to double-click. Press the **Esc** button to right-click.
- To drag-and-drop, hold down the **Enter** button. Then use the arrow buttons to drag the object. When it's where you want it, release the **Enter** button.

note

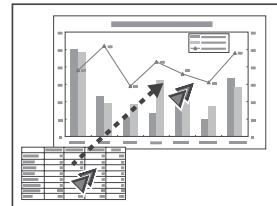

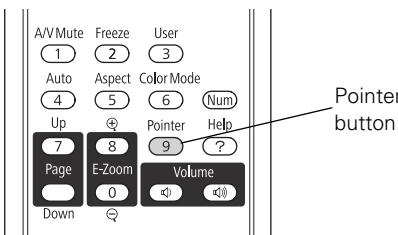

You may be able to use the Page Up/Page Down feature with USB Display.

Highlighting Your Presentation

You can display a pointer to call out important information on the screen. If you want to customize the pointer tool, you can choose from three alternative shapes.

Using the Pointer Tool

1. To activate the pointer tool, press the **Pointer** button on the remote control. A pointer appears on the screen.

If you prefer to use a different style of pointer, see the instructions in the next section.

2. Use the arrow buttons on the remote control to position the pointer on the screen.
3. When you're done using the pointer, press the **Pointer** or **Esc** button to clear the screen.

Customizing the Pointer Tool

You can change the appearance of the pointer by choosing from three alternative shapes.

1. Press the **Menu** button on the remote control, highlight the **Settings** menu, highlight **Pointer Shape**, and press **Enter**. You can select one of the pointer shapes shown at the left.
2. Select the shape you want and press **Enter**.
3. Highlight **Return** and press **Enter**.
4. Press **Menu** to exit from the menu system.

Presenting a Slideshow

note

You can project .JPG files in resolutions up to 4608 × 3072, with pixel counts incrementing in multiples of 8.

If a .JPG file is highly compressed, your projector may not be able to display it correctly. The projector can't display progressive or CMYK .JPG files.

You cannot project movie files using the Slideshow feature.

You can use your projector's Slideshow feature whenever you connect a USB device that contains image files having a .JPG filename extension. This lets you quickly and easily display individual images, or start a slideshow of all the images in a folder. You can control your slideshow using the projector remote control.

For an instant PowerPoint presentation, convert your PowerPoint slides to individual .JPG files (save as *.jpg) and store them in a folder. Copy that folder to a USB flash memory drive (thumb drive), or other USB device. Then connect the device to the projector and begin your presentation.

You can switch the display from the device displaying the slideshow to another source using the **Source Search** button or one of the specific source buttons on the remote control. To return to the Slideshow source, press **Source Search** and select **USB**, or simply press the **USB** button.

Starting a Slideshow

1. Connect a USB device to the projector's TypeA • (flat) USB port (see page 57).
2. If you are connected to another image source, press the **USB** button on the remote control to go to the Slideshow program.

If you are not connected to another image source, the Slideshow program appears automatically.

If necessary, press the arrow buttons on the remote control to highlight the device you want to present from, then press the **Enter** button.

3. If you need to select a subfolder on your device, press the arrow buttons to highlight the folder and press **Enter**.
4. To display an individual image, press the arrow buttons to highlight it and press **Enter**. To display additional image files, press the **◀** or **▶** arrow button.
5. To display a slideshow of all the images in the current folder, use the arrow buttons to highlight **Slideshow** on the bottom of the Slideshow screen and press **Enter**. The images display sequentially one time through. At the end, you see the folder display again.

Select the following as necessary to control your display or slideshow:

- To move back up a folder level, highlight **Back to Top** at the top of the Slideshow screen and press **Enter**.
- To select a different device, highlight **Select drive** in the upper right corner of the screen, press **Enter**, and select the device.
- If all the images in a folder do not fit on the Slideshow screen, highlight **Next page** at the bottom of the screen and press **Enter** to display the next screen full of images. Select **Previous page** at the top of the screen to select the previous screen.

note

*To rotate a displayed image, press the **▲** or **▼** button on the remote control until it is displayed correctly.*

note

*To display a slideshow from a folder that is not open, highlight the folder and press the **Esc** button on the remote control. Then select **Slideshow** from the menu that appears and press **Enter**.*

*To begin a slideshow from a particular image, use the arrow buttons to highlight that image, press **Enter**, then press **Enter** again.*

- To exit the slideshow, press **Esc**, select **Exit**, and press **Enter**.

Selecting Slideshow Display Options

1. Highlight **Option** at the bottom left corner of the slideshow screen and press **Enter**. You see this screen:

2. Highlight the options you want to use, and press **Enter**.

Option	Available settings
Display order	Name order displays files in name order Date order displays files in date order
Sort order	In Ascending sorts the files first to last In Descending sorts the files last to first
Continuous play	On displays a slideshow continuously Off displays a slideshow one time through
Screen switching time	No does not switch file display automatically 1Sec. to 60Sec. displays files for the selected time and switches them automatically

3. When you are finished, highlight **OK** at the bottom of the screen and press **Enter**. (Highlight **Cancel** and press **Enter** to cancel your changes.)

3

Connecting to Computers, USB Devices, and Other Equipment

This chapter tells you how to connect the projector to a notebook or desktop computer or to video equipment, such as a VCR, DVD player, or video camera.

You can also connect the projector to a USB storage device or digital camera.

Follow the instructions in this chapter on:

- Connecting to a computer
- Connecting to video equipment
- Connecting an external monitor
- Playing sound through the projector
- Connecting to a digital camera or other USB device

note

If you have an iBook with an RCA video-out port, follow the instructions for connecting to a video device on page 49.

Connecting to a Computer

You can connect the projector to any computer using the projector's TypeB  (square) USB port, including desktop models, PC notebook computers, Macintosh® PowerBook® and iBook computers, and other devices.

You can also connect the projector to any computer that has a standard video output (monitor) port. See page 46 for instructions.

To play sound through the projector, connect an audio cable (see page 53).

You may be able to use your remote control as a wireless mouse when projecting from a computer (see page 38).

Connecting to the USB Port

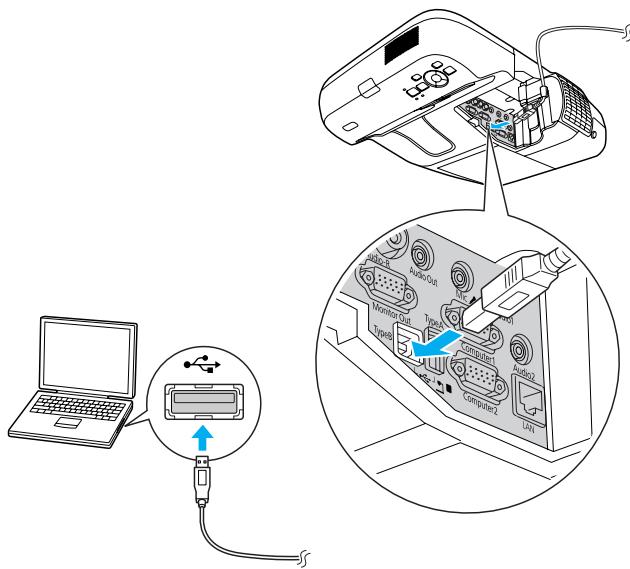

You can connect a Windows® or Macintosh computer to the projector's TypeB  (square) USB port and project your computer's display. This feature supports the following operating systems: Windows 7, Windows Vista®, Windows XP, Windows 2000 (SP4), or Mac OS® 10.5.1 or later.

A USB 2.0 connection (recommended) provides better picture quality and response than USB 1.1.

The first time you connect a computer to the projector's USB port, software from the projector is installed on your computer.

1. Follow the instructions beginning on page 25 to turn on the projector.
2. Make sure the **USB Type B** setting on the Extended menu is set to **USB Display** (see page 67).
3. Turn on your computer.

4. Connect the square end of a USB cable to the projector's TypeB (square) USB port.

5. Connect the flat end of the cable to any available USB port on your notebook or desktop computer.

Messages appear on your computer screen as the projector is recognized and the software is installed automatically.

On Mac OS, double-click the **USB Display Installer** icon to install the software.

6. Follow the instructions on the screen to install the Epson USB Display software. If you see a "Digital Signature Warning," select **Continue** or **Continue Anyway**. (You see these instructions only the first time you connect.)

After the software is installed, you see your computer's current desktop displayed by the projector. You can switch the projector to other image sources using the **Source Search** button on the remote control or the projector.

7. You can connect an optional audio cable if you want to play sound through the projector (see page 53).

note

If the software does not install automatically, you can install it manually. See page 113 for instructions.

When you've finished making connections, see page 28 for instructions on displaying and adjusting the image.

8. When you're done projecting, do one of the following:
Windows: simply disconnect the USB cable.
Mac OS: click the USB Display icon on the Dock and drag it to the trash, then remove the USB cable.

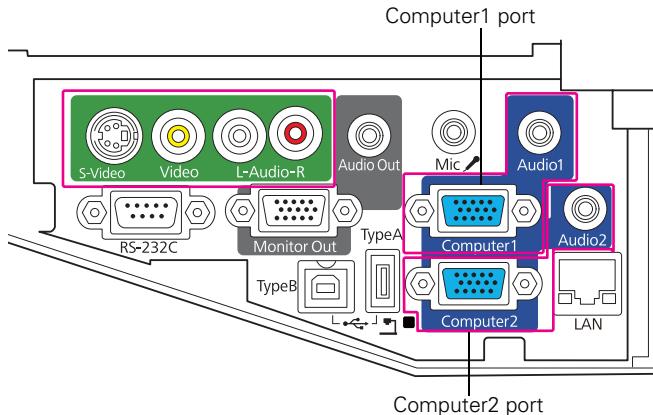

Connecting to the VGA Computer Port

You can connect to the projector using the VGA computer cable that came with it (the monitor port on your computer must be a D-sub 15-pin port).

1. Connect one end of the VGA computer cable to the projector's **Computer1** or **Computer2** port and the other end to your computer's monitor port.

caution

Don't try to force a connector to fit a port with a different shape or number of pins. You may damage the port or connector, or the device you are trying to connect.

2. You may need to change the **Input Signal** setting in the projector's Signal menu to **RGB** or **Auto** (see page 64).
3. You can connect an optional stereo mini-jack audio cable to play sound through the projector (see page 53).
4. You may also be able to use the remote control as a wireless mouse (see page 38).

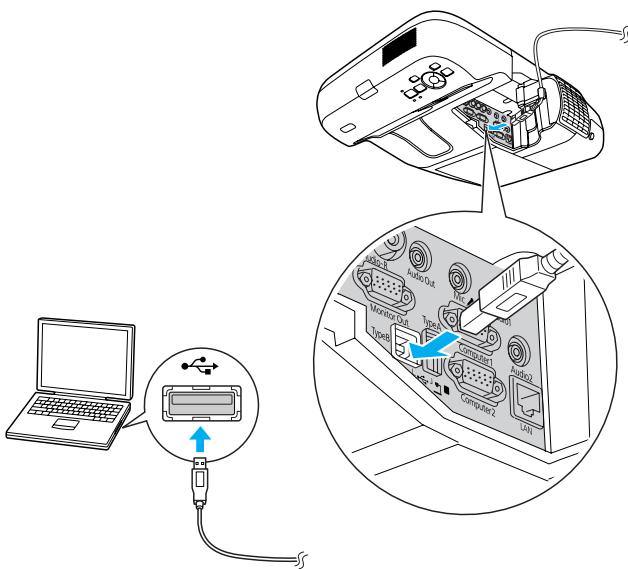

When you've finished making connections, see page 25 for instructions on turning on the projector and page 28 for instructions on displaying and adjusting the image.

Connecting the USB Cable for Remote Mouse Control

If you've connected a computer as described in this chapter using the Computer1 or Computer2 port, you can use the projector's remote control as a wireless mouse. This lets you control your computer and click through slideshow-style presentations, such as PowerPoint®, from up to 20 feet (6 meters) away (see page 38 for more information).

The wireless mouse function is supported on systems with a USB port running Windows or Mac OS.

1. Connect the square end of a USB cable to the projector's TypeB  (square) USB port.

2. Connect the flat end of the cable to any available USB port on your notebook or desktop computer.
3. Set the **USB Type B** setting in the projector's Extended menu to **Wireless Mouse** (see page 68).

4. Press the **Computer** button on the remote control to select your computer as the source. (The wireless mouse function doesn't work when other sources are selected.)
5. If necessary, configure your computer to work with a USB mouse. See your computer documentation for details.

note

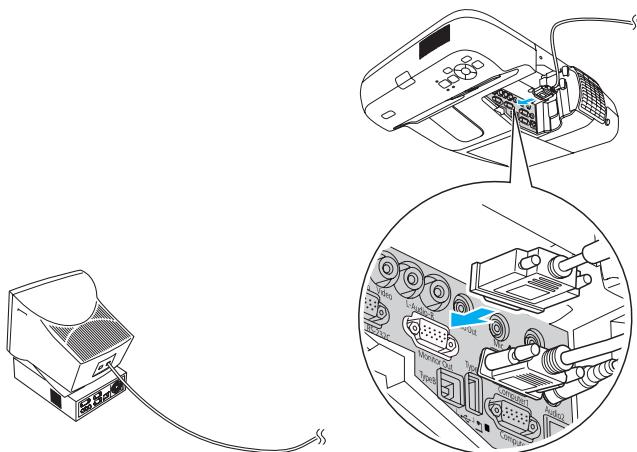

Some LCD monitors may not be able to display the image correctly. If you have trouble displaying the image, connect a multiscan monitor. If you're projecting computer images, make sure the computer's refresh rate is set to 65 Hz or greater.

The projector must be turned on for the Monitor Out port to send a signal to the monitor (though it may be in standby mode). Make sure Standby Mode is set to Communication On in the Extended menu. See page 67.

Connecting an External Monitor

If you want to view your computer presentation close-up (on a monitor) as well as on the screen, you can connect an external monitor. You can use it to check on your presentation even if you've pressed the **A/V Mute** button or switched to a different picture source. Only computer images will appear on the external monitor, not video images.

First make sure your computer's VGA cable is connected to the projector's **Computer1** or **Computer2** port (see page 46). Then connect your monitor to the projector's **Monitor Out** port, as shown:

Connecting to Video Equipment

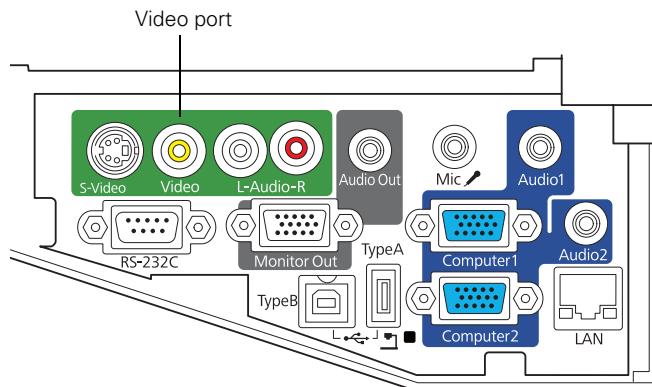

You can connect several video sources to the projector at the same time. Before starting, look at your video equipment to determine its available video output connections:

- If your video player has a yellow RCA video output connector, see “Connecting a Composite Video Source” on page 49.
- If your video player has an S-Video connector, see “Connecting an S-Video Source” on page 50.
- If your video player has a component video port (three connectors labeled either Y/Cb/Cr or Y/Pb/Pr), see “Connecting a Component Video Source” on page 51.
- If your video player has an RGB video port, see “Connecting an RGB Video Source” on page 52.

After connecting video cables, you may also want to connect an optional audio cable to play sound through the projector; see page 53.

Connecting a Composite Video Source

1. If your video cable has an RCA connector, connect it to the yellow video output connector on your player and the yellow **Video** port on the projector.

note

If the video cable was not provided with your video device, you can purchase one from an electronics dealer.

2. If you want to play sound through the projector, see page 53 for instructions on connecting an audio cable.

- When you've finished making connections, see page 25 for instructions on turning on the projector and page 28 for instructions on displaying and adjusting the image.

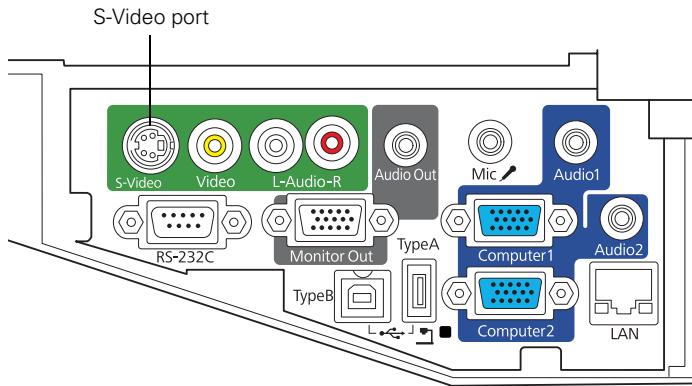

Once the projector is turned on, select the image source by pressing the **Source Search** button on the projector or remote control.

note

If the S-Video cable was not provided with your video device, you can purchase one from Epson; see page 19.

Connecting an S-Video Source

- Connect the S-Video cable to the S-Video connector on your player and the S-Video port on the projector.

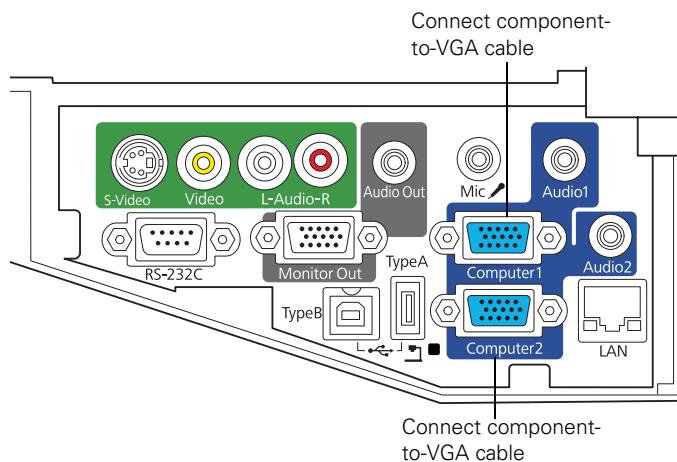

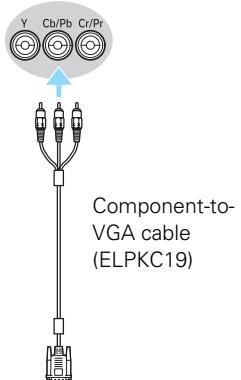

- If you want to play sound through the projector, see page 53 for instructions on connecting an audio cable.
- When you've finished making connections, see page 25 for instructions on turning on the projector and page 28 for instructions on displaying and adjusting the image.

Once the projector is turned on, select the image source by pressing the **Source Search** button on the projector or remote control.

Connecting a Component Video Source

If your video equipment has component video connectors (three connectors labeled either Y/Cb/Cr or Y/Pb/Pr), you will need a component-to-VGA video cable or a component video cable and adapter. You can order the component-to-VGA cable (ELPKC19) from Epson (see page 19) or an electronics dealer.

1. Connect the component end of the cable (3 male RCA) to the color-coded Y/Cb/Cr (or Y/Pb/Pr) connectors on your player.
2. Connect the other end of the cable (HD15 male) to the blue Computer1 or Computer2 port on the projector.

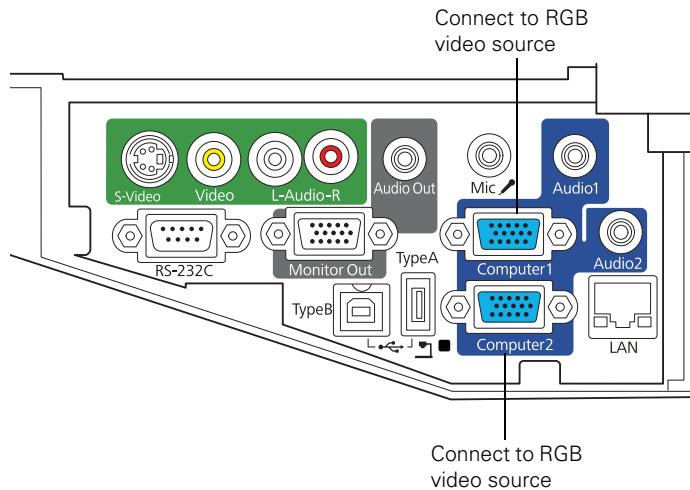

3. You may need to change the **Input Signal** setting in the projector's Signal menu to **Auto** (see page 64).
4. If you want to play sound through the projector, see page 53 for instructions on connecting an audio cable.
5. When you've finished making connections, see page 25 for instructions on turning on the projector and page 28 for instructions on displaying and adjusting the image.

Once the projector is turned on, select the image source by pressing the **Source Search** button on the projector or remote control.

Connecting an RGB Video Source

You can connect to an RGB video source using the VGA computer cable provided with the projector.

1. Connect the cable to the RGB video port on your player and the Computer1 or Computer2 port on the projector.

2. You may need to change the **Input Signal** setting in the projector's Signal menu to **RGB** (see page 64).
3. If you want to play sound through the projector, see page 53 for instructions on connecting audio cables.
4. When you've finished making connections, see page 25 for instructions on turning on the projector and page 28 for instructions on displaying and adjusting the image.

Once the projector is turned on, select the image source by pressing the **Source Search** button on the projector or remote control.

Playing Sound Through the Projector

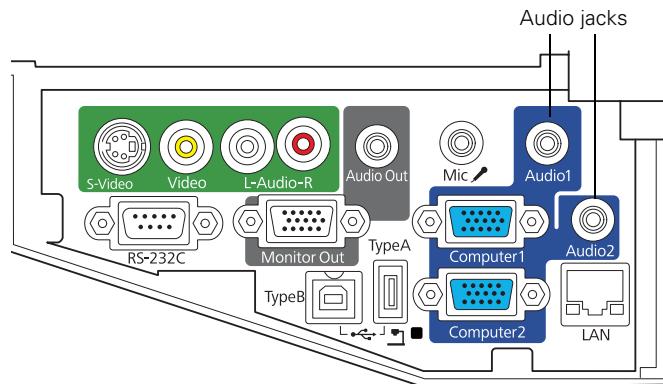

You can play sound through the projector's speaker system or attach an external speaker system. You can also connect a microphone and output sound through the projector.

You can use the or Volume buttons on the remote control to adjust the volume.

Playing Computer Audio

For laptop and most desktop computers, use a 3.5 mm stereo mini-jack cable, which you can purchase from a computer or electronics store.

1. Connect one end of the cable to the **Audio1** or **Audio2** jack on the projector.

2. Connect the other end to your laptop's headphone jack or audio-out jack, or your computer's speaker or audio-out port.

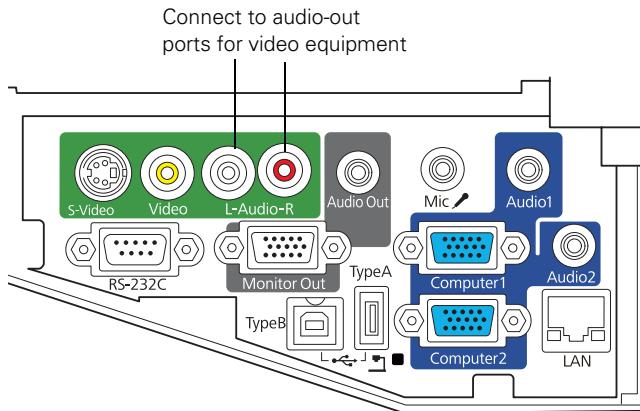

Playing Sound from Video Equipment

For video equipment, use an RCA-style audio cable, which you can purchase from an electronics store.

note

If you are using a component-to-VGA cable, you will need to connect an audio adapter to use the Audio1 or Audio2 jack.

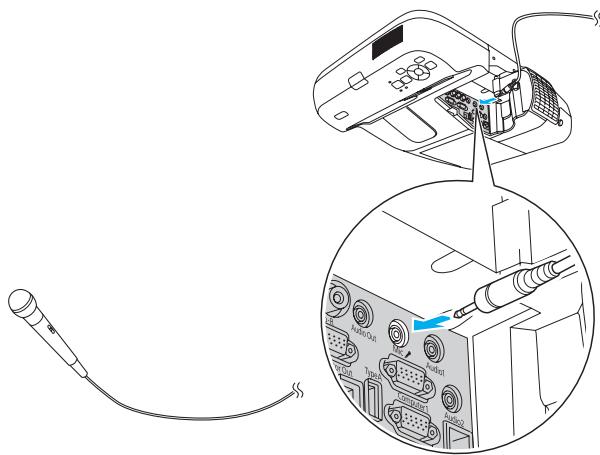

1. Connect the red and white plugs on one end of the cable to the L and R Audio jacks on the projector.

2. Connect the red and white plugs on the other end to the corresponding color-coded audio output jacks on your video source.

Connecting a Microphone

You can connect a dynamic microphone to the projector's **Mic** port, using a 3.5 mm mini-jack cable as shown below.

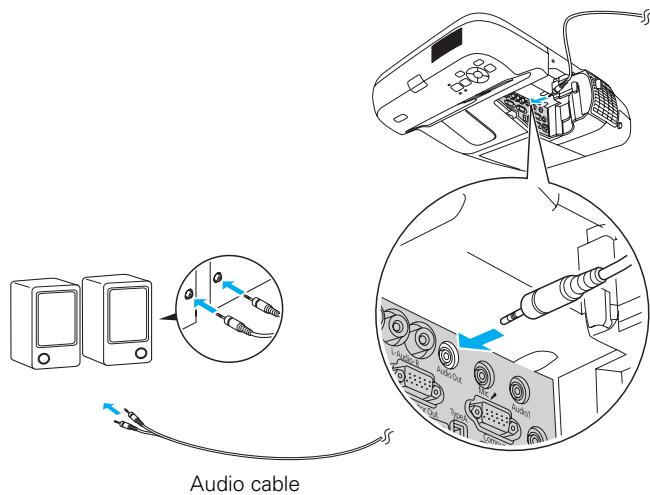

Use the **Mic Input Level** option on the Settings menu to adjust the volume. See page 66 for more information.

Connecting External Speakers

You can output sound from the projector to external speakers with a built-in amplifier.

1. Locate the appropriate cable to connect your speakers.
Depending on your speakers, you may be able to use a standard audio cable with a stereo mini-jack connector on one end and pin jacks on the other end. For some speakers, you may need a special cable or adapter.
2. Connect the stereo mini-jack end of the audio cable to the **Audio Out** port on the projector.

3. Connect the other end of the cable to your speakers.

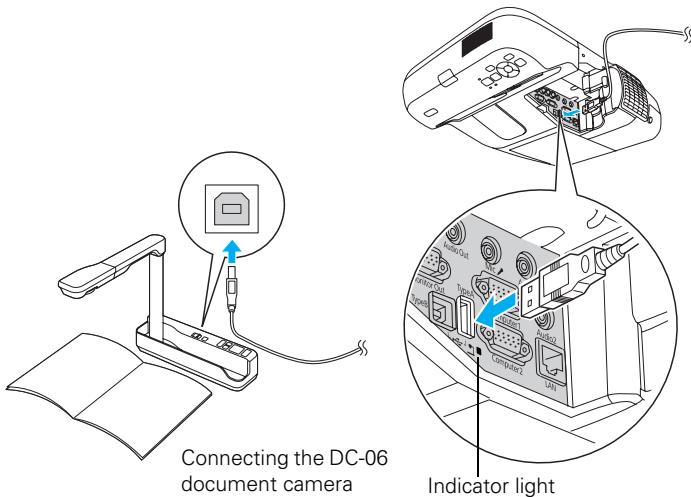

The projector's internal speaker system is disabled while sound is output to external speakers.

Connecting a Document Camera or Other USB Device

You can connect an interactive whiteboard, document camera, USB thumb (flash memory) drive, USB hard drive, or multimedia storage viewer, such as the Epson P-7000. You can use the projector's Slideshow function to display JPEG images or a presentation. See page 40 for details.

Use the USB cable specified for your device.

1. Follow the instructions beginning on page 25 to turn on the projector.
2. Connect the USB drive or the flat end of the USB cable to the TypeA  (flat) USB port on the projector, as shown.

3. Connect the other end of the cable to your camera or other device, if necessary.

The indicator light on the projector turns orange and then green when a USB device is connected.

4. If the projector is connected to a storage device (and not connected to another image source), the Slideshow program appears.

note

Use a cable less than 10 feet (3 meters) long and connect the camera or other device directly to the projector.

Your projector may not function correctly if you use a longer cable or connect to a USB hub.

If you connect a USB hard drive, make sure you use the AC adapter to power the hard drive. Make sure the file format is FAT 16/32. Some USB hard drives may not be supported.

If you are connected to another image source, press the **USB** button on the remote control to go to the Slideshow program.

5. See page 40 for instructions on controlling the slideshow.
6. When you're finished, press **Esc** and select **Exit** to exit the Slideshow before turning off or removing the USB device.

Be sure to turn off your USB device (if necessary) before you remove the device or cable from the projector. Failure to do so may damage the device and/or the projector.

4

Fine-Tuning the Projector

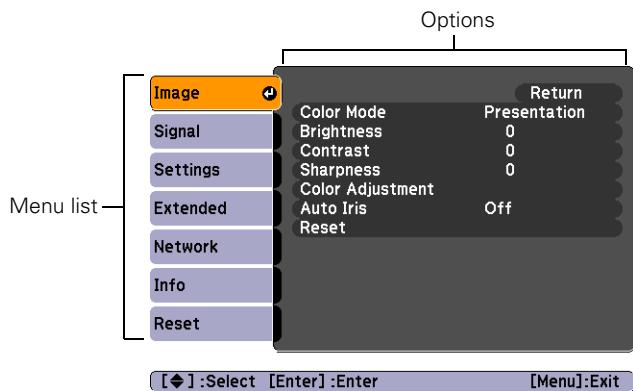

You can use the projector's on-screen menus to adjust the image, sound, and other features. This chapter covers the following information:

- Using the menu system
- Adjusting the image
- Adjusting signal settings
- Customizing projector features
- Customizing power and operation
- Using the projector security features

Using the Menu System

You can use the remote control or the projector's control panel to access the menus and change settings. Follow these steps:

1. To display the menu screen, press the **Menu** button on the remote control or on the projector. You see a menu screen similar to the one below:

The menus are listed on the left and the options available for the highlighted menu are shown on the right.

2. Use the arrow buttons on the remote control or the projector to scroll through the menu list. When you've highlighted the desired menu, press the **Enter** button to select it.
3. Once you've selected the menu, use the arrow buttons to scroll through the list of options. (Some of the options may be grayed out or unavailable, depending on the selected source.)
4. After highlighting the option you want to adjust, use the arrow buttons to change the setting. In some cases, you may have to press the **Enter** button to view a sub-screen.
 - Press the left or right arrow button to adjust a slider bar.
 - To select from two or more settings, press the up or down arrow button to highlight the setting and press **Enter**.

- After changing the settings, press the **Esc** button to save your changes and return to the previous menu (or press it again to exit the menu system). You can also press the **Menu** button to exit.

Restoring the Default Settings

You can use the **Reset** option on any menu to restore the factory-default settings for the settings in that menu.

To restore all the projector settings to their factory-default values, select the **Reset** menu, highlight **Reset All**, press **Enter**, and select **Yes** to confirm.

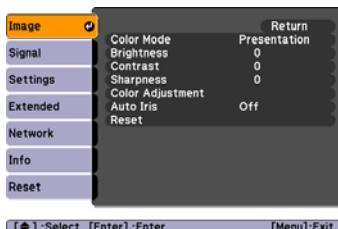

note

*When you select **Reset All** in the **Reset** menu, it does not reset the **Input Signal**, **User's Logo**, **Language**, or **Lamp Hours** settings.*

Adjusting the Image

You can use the **Image** menu to adjust the brightness, sharpness, color, tint, contrast, and **Auto Iris** settings.

- Press the **Menu** button on the projector or remote control and select the **Image** menu. You see a screen similar to one of these:

Computer/USB/USB Display/LAN

Component video/
Composite video/
S-Video

note

The available settings vary depending on the input source selected.

The Brightness setting changes the opacity of the projector's LCD panels. You can also change the lamp's brightness. Select Power Consumption in the Settings menu, then choose Normal or ECO (the default setting is Normal).

2. Adjust the desired options as needed:

- **Color Mode**

Lets you quickly adjust the color and brightness for various environments. You can save a different setting for each source. See page 30 for a description of each color mode.

- **Brightness**

Lightens or darkens the overall image.

- **Contrast**

Adjusts the difference between light and dark areas.

- **Color Saturation**

Adjusts the color depth of the image.

- **Tint**

Adjusts the balance of green to magenta in the image.

- **Sharpness**

Adjusts the sharpness of the image.

- **Color Adjustment**

Adjusts the color values. Select **Abs. Color Temp.** to adjust the overall value from 5000 °K (red) to 10000 °K (blue). Select **Red**, **Green**, **Blue** to adjust red, green, and blue hue and saturation values. (Not available if **sRGB** is selected as the Color Mode setting.)

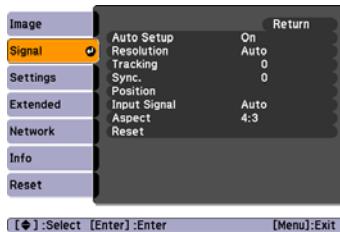

- **Auto Iris**

Automatically adjusts the projected luminance according to the brightness of the image. (Available only when **Dynamic** or **Theater** is selected as the Color Mode for the current input source.)

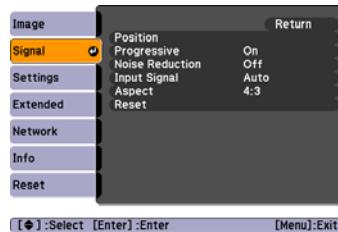

Adjusting Signal Settings

Although the projector normally detects and optimizes the input signal automatically, you can use the Signal menu to make manual adjustments. In addition to changing the position of the projected image, you can correct tracking and sync for computer images, or change the aspect ratio.

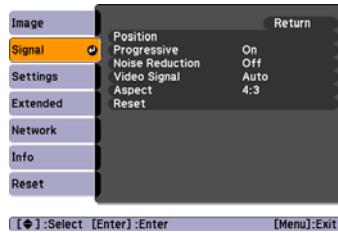

1. Press the **Menu** button and select the **Signal** menu. You see a screen similar to one of those below. (The settings will be different depending on the source you are projecting from.)

Computer

Component video

Composite video/S-Video

2. Adjust the desired options as needed:

- **Auto Setup**

Leave this setting **On** to automatically optimize computer images. Turn it off if you want to save adjustments you have made to the Tracking, Sync, and Position settings.

- **Resolution**

Set to **Auto** to have the projector automatically identify the resolution of the input signal. If necessary, select **Wide** (for widescreen images) or **Normal** (for 4:3 or 5:4 ratio images).

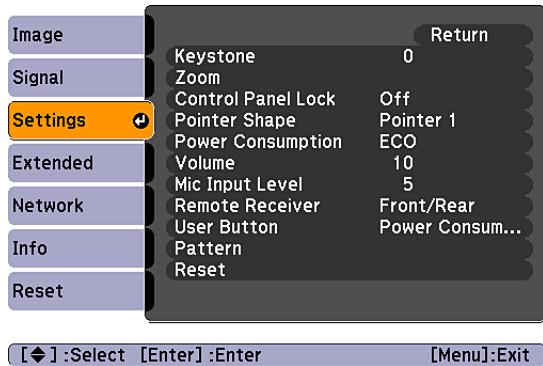

note

You can also use the remote control's **Auto** button to automatically reset the projector's **Tracking**, **Sync**, and **Position** settings. See page 118 for details.

- **Tracking**
Adjust this value to eliminate vertical stripes in computer images.
- **Sync**
Adjust this value if computer images appear blurry or flicker.
- **Position**
If the image is slightly cut off on one or more sides, it may not be centered exactly. Select this setting and use the arrow buttons to center it.
- **Progressive**
For composite video, S-Video, and component video. Turn this setting on to convert interlaced signals into progressive signals (best for moving images). Leave the setting **Off** for still images.
- **Noise Reduction**
Smooths out rough images. You may need to experiment to select the best setting for your image. Select **Off** when viewing low-noise image sources, such as DVDs.
- **Input Signal**
If the colors don't look right on the **Auto** setting, select the setting for the type of equipment you've connected to the **Computer1** or **Computer2** port. Choose **RGB** for a computer or RGB-video connection, or **Auto** for a video player that outputs a component video signal (with connectors labeled **Y/Cb/Cr** or **Y/Pb/Pr**).
- **Video Signal** (composite or S-Video signals only)
Select the setting for the type of equipment you've connected to the **Video** port. Leave this setting at **Auto** unless you are using a 60-Hz PAL system (then select **PAL60**).
- **Aspect**
Sets the image's aspect ratio (ratio of width to height). See page 31 for more information.

Customizing Projector Features

You can use the Settings menu to lock the buttons on the projector, adjust audio volume, and customize several other features.

- **Keystone**
Adjusts the shape of the image if the projector has been tilted upward or downward. If you notice that lines or edge look jagged after adjustment, decrease the **Sharpness** setting (see page 61).
- **Zoom**
Adjusts the image size from **Wide** (larger) to **Tele** (smaller).
- **Control Panel Lock**
Lets you disable all of the buttons on the projector, or all of the buttons except the power button. See page 73 for more information.
- **Pointer Shape**
Lets you choose from three alternative pointer shapes. See page 39 for more information.
- **Power Consumption**
Lets you select from two levels of brightness. The **ECO** setting reduces power consumption and projector noise, and extends the lamp's operating life.
- **Volume**
Raises or lowers the volume of the projector's speaker.

- **Mic Input Level**
Adjusts the microphone volume.
- **Remote Receiver**
Deactivates the projector's front and/or rear sensors that detect signals from the remote control. Use this setting to prevent use of the remote control or to stop interference from bright fluorescent lights. Restart the projector for this setting to take effect.
- **User Button**
Lets you create a shortcut to one of the following menu items: , **Power Consumption**, **Info**, **Progressive**, **Closed Caption**, **Test Pattern**, **Resolution**, **Mic Input Level**, or **Pattern Display**. When you press the **User** button on the remote control, the assigned menu item is displayed.
- **Pattern**
Lets you select one of the following:
 - Pattern Display** to display one of the available patterns.
 - Pattern Type** to select from the following 4 patterns, or select a user-defined pattern:

Pattern 1

Pattern 2

Pattern 3

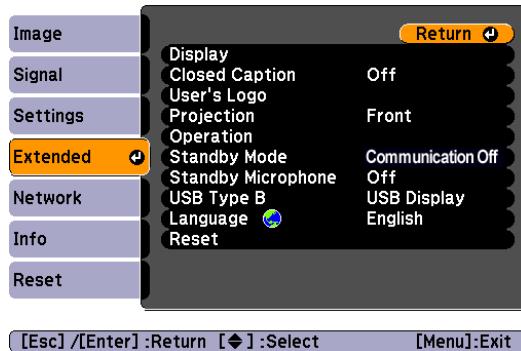

Pattern 4

User Pattern to capture a customized pattern. See page 37 for more information.

Test Pattern to display a pattern that you can use for adjusting the projector without connecting it. You can adjust the zoom, focus, and keystone correction. To cancel the test pattern, press the **Esc** button on the remote control.

Customizing Power and Operation

You can use the Extended menu to customize the way the projector displays images, enable Direct Power On, use closed captioning, turn sleep mode on or off, and customize other projector operations.

■ Display

Messages: Lets you turn screen messages on or off.

Display Background: Sets the screen background to Black, Blue, or Logo when no image signal is available.

Startup Screen: Enables or disables display of the startup (User's Logo) screen when the projector is turned on.

A/V Mute: Sets the screen background to Black, Blue, or Logo when the A/V Mute button is pressed.

■ Closed Caption

Lets you display closed captioning for content that provides it.

■ User's Logo

Create a custom startup screen, as described on page 71.

■ Projection

Select **Front** (to project onto the front of a screen), **Front/Ceiling** (when the projector is mounted upside-down), **Rear** (to project from behind onto a transparent screen), or **Rear/Ceiling** (to project from behind onto a transparent screen when the projector is mounted upside-down).

note

If you hold down the A/V Mute button on the remote control for about five seconds, you switch between Front and Front/Ceiling or Rear and Rear/Ceiling.

If Direct Power On is enabled, the power cord is connected, and a power outage occurs, the projector will start when the power is restored.

■ Operation

Direct Power On: Enable if you want to be able to start the projector when you connect the power cord (without pressing the  power button).

Sleep Mode: Enable if you want the projector to turn off automatically if it is idle and no signal is received for 1 to 30 minutes (you can adjust the amount of time using the next setting).

Sleep Mode Timer: When Sleep Mode is on, you can set the period of time before the projector turns off automatically, from 1 to 30 minutes.

note

Do not use the projector at altitudes above 7,500 feet (2,286 meters).

High Altitude Mode: Enable when you are using the projector above 4,900 feet (1,500 meters) to ensure that the temperature is regulated properly. Turn this setting off for lower elevations.

■ Standby Mode

Select **Communication On** to enable the projector to be monitored and controlled from a computer when it is in standby mode (the power light is orange). This setting also allows you to use a microphone connected to the projector when the projector is in standby mode.

■ USB Type B

Select how you want to use the **TypeB**  (square) USB port. Select **USB Display** to use the USB port to project computer images. Select **Wireless Mouse** to use the remote control buttons like a wireless mouse. See page 38 for restrictions and details.

■ Language

Select a language to use for the projector menus and messages.

Using the Projector Security Features

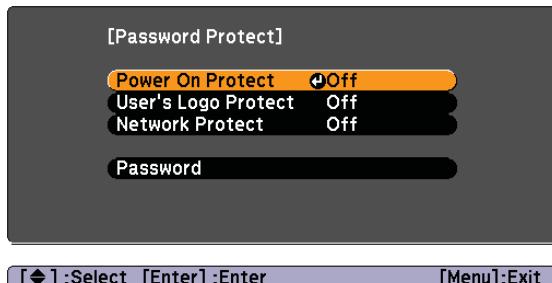

To prevent unauthorized use of the projector, you can:

- Assign a password. You can use the password to prevent the projector from being turned on and prevent your custom startup screen from being changed. See the next section.
- Create a custom screen that is displayed at startup and/or when the A/V Mute button is pressed. The screen can be locked with a password to discourage theft and provides a way to identify the projector should it be stolen. See page 71.
- Disable the projector's buttons; this is useful, for example, in a classroom when you want to ensure that no one touches the projector's buttons while you're using the remote control. See page 73.
- Secure the projector to prevent theft using a cable locking system. See page 74.

Enabling Password Protection

The default setting for the password is 0000. Follow these steps to create a new password:

1. Press the **Freeze** button on the remote control for five to seven seconds. You see this screen:

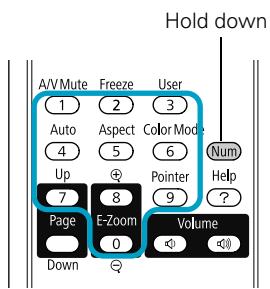

2. Select the type(s) of password protection you want to use:

caution

If you lose the remote control, you will not be able to enter the password. Keep the remote control in a safe place at all times. Also, it's a good idea to write down your password.

- **Power On Protect:** Prevents unauthorized use of the projector. After the projector is plugged in and turned on, you must enter a password to use the projector. Select **On**, press **Enter**, then press **Esc** to return to the Password Protect screen.
- **User's Logo Protect:** Prevents your custom screen (see page 71), display, and User's Logo settings in the Extended menu from being changed. Select **On**, press **Enter**, then press **Esc** to return to the Password Protect screen.
- **Network Protect:** Prevents any of the network settings from being changed. Select **On**, press **Enter**, then press **Esc** to return to the Password Protect screen.

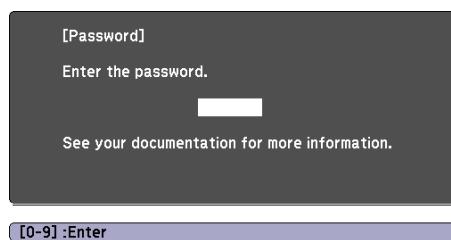

3. Use the arrow buttons to select **Password** and press **Enter**.
4. When you see a message asking if you want to change the password, select **Yes** and press **Enter**.
5. Hold down the **Num** button and use the numeric keypad to enter a four digit password.
6. When you see a confirmation message, re-enter the password.
7. Press the **Menu** button, then press **Enter** to exit the screen.
8. Turn off and unplug the projector.

Starting the Projector With a Password

When the password function is enabled, you see this screen when you plug in and turn on the projector:

note

If you leave the projector plugged in, the Password screen will not appear. It appears only if you unplug and reconnect the power cord.

Hold down the **Num** button and use the numeric keypad to enter the four digit password.

The password screen closes and projection begins.

If projection does not begin, check the following:

- If the password is not correct, you see a message prompting you to re-enter the password. If you enter an incorrect password three times in succession, you see an error code with the message **The projector's operation will be locked** and the projector switches to standby mode. Write down the error code, then disconnect the projector's power cord from the electrical outlet, reconnect it, and turn the projector back on. Try entering the correct password again.
- If you have forgotten the password, contact Epson with the request code number that appears in the Password screen for assistance. See "Where To Get Help" on page 124.
- If you enter an incorrect password 30 times in succession, the projector remains locked and you must contact Epson to arrange for service.

Creating Your Own Startup Screen

You can transfer any image from your computer or video source to the projector and then use it as your startup screen. You can also use it as the screen displayed when the projector is not receiving a signal or when you press the A/V Mute button. The image can be a company logo, slogan, photograph, or any other image you want to use.

note

When you choose an image for the user's logo, it erases any previously used image.

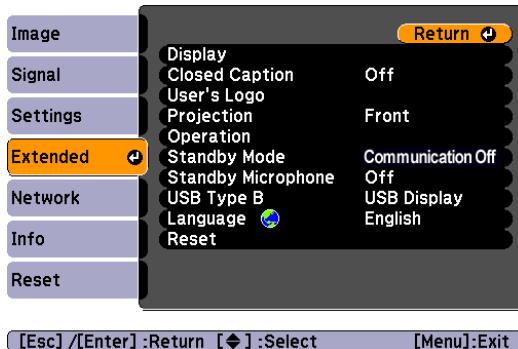

You can save an image up to 300 × 400 pixels in size.

Once you have saved a new user's logo, you cannot return to the factory default logo.

Capturing the Image

Start by displaying the image you want to use from either a computer or video source, such as a DVD player or digital camera. Then follow these steps to capture the image and transfer it to the projector:

1. Press the **Menu** button on the remote control, highlight the **Extended** menu, and press **Enter**.

2. Highlight **User's Logo** and press **Enter**.
3. When you see a message asking **Choose this image as the User's Logo?**, select **Yes** and press **Enter**. A selection box displays over the image.
4. Use the arrow buttons to select the area of the image you want to use. Then press **Enter**.
5. When you see the message **Select this image?**, highlight **Yes** and press **Enter**.
6. Use the arrow buttons to select a zoom factor (display size) and press **Enter**.
7. When the message **Save this image as the User's Logo?** appears, select **Yes** and press **Enter**. Saving the logo may take a few moments. Do not use your projector, remote control, or video source while the logo is being saved.
8. When you see the message **Completed**, press **Menu** to exit.

Choosing When to Display the Image

After your image is saved, you can set it to display as the startup screen, the screen you see when there's no signal, or the screen you see when you press the A/V Mute button (see page 34).

1. Press the **Menu** button, highlight the **Extended** menu, and press **Enter**.
2. Select **Display** and press **Enter**.
3. Choose from these display options:
 - Set **Display Background** to **Logo** to display your image when there is no signal.
 - Set **Startup Screen** to **On** to display your image when the projector is warming up.
 - Set **A/V Mute** to **Logo** to display your image when you press the A/V Mute button.
4. When you're finished, press **Menu** to exit.

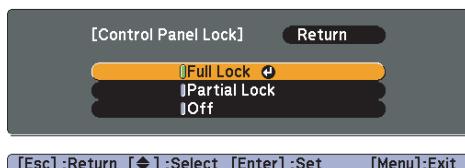

note

You can lock these settings to prevent them from being changed without a password (see page 69).

Disabling the Projector's Buttons

When you enable the Control Panel Lock function, you can lock all of the projector's buttons, or all of the buttons except the \odot power button. The remote control can still be used to operate the projector.

1. Press the **Menu** button, highlight the **Settings** menu, and press **Enter**.
2. Select **Control Panel Lock** and press the **Enter** button.
3. Select **Full Lock** (to lock all projector buttons) or **Partial Lock** (to lock all buttons except the \odot power button) and press **Enter**.

4. Select **Yes** and press **Enter** to confirm the setting.

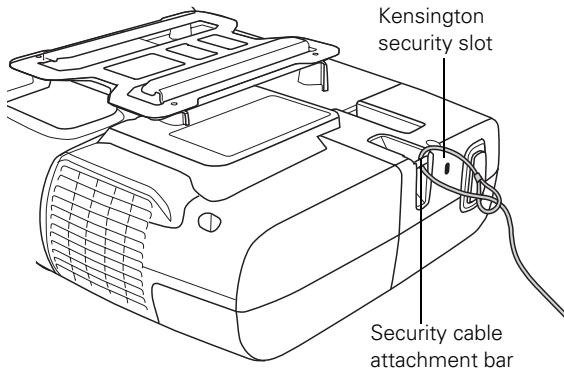

5. Press the **Menu** button to exit.

To disable the Control Panel Lock function, select **Off** in the Control Panel Lock menu. Or press and hold the **Enter** button on the projector's control panel for seven seconds. A message is displayed and the lock is released.

Using Security Locking

The projector includes two security locking points to prevent its theft when installed or used in public locations:

- **Security cable attachment.** You can attach a commercially available security cable as shown below to secure the projector to the wall mount (setting plate) or a ceiling mount.

- **Kensington security slot.** The security slot (located on the side of the projector) is compatible with the MicroSaver security systems manufactured by Kensington. You can purchase this lock from Epson (see page 19).

5

Using the Projector on a Network

This chapter tells you how to prepare to send images to your projector through a wireless or wired network.

Using Quick Wireless Connection or EasyMP Network Projection, you can project images shown on your computer screen—including text, graphics, and video—directly to your audience. See the *EasyMP Network Projection Operation Guide* for information on features and use.

You can use EasyMP Monitor (available for Windows only) to monitor and control your projector through the network. For information on installing and using EasyMP Monitor, see the *EasyMP Monitor Operation Guide*.

You'll find instructions in this chapter on:

- Connecting the projector to a wired LAN
- Installing the optional wireless LAN module
- Using Quick Wireless Connection
- Configuring projector and network settings
- Using wireless security options
- Sending e-mail alerts and monitoring the projector
- Using a browser to control the projector

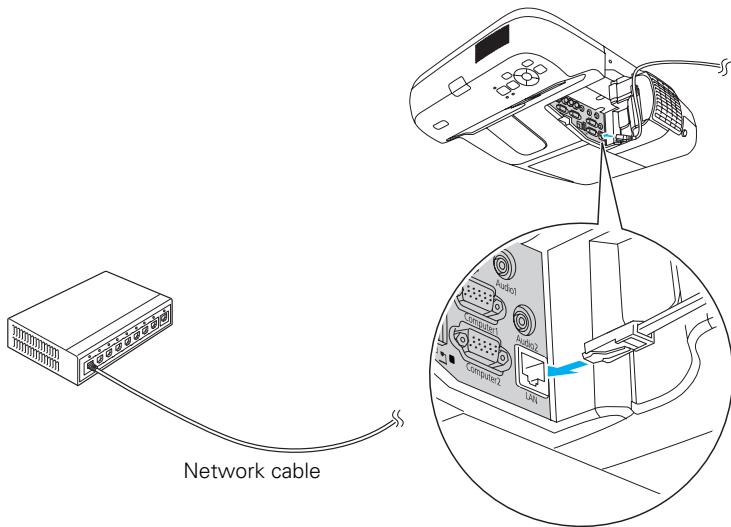

For wireless connection, make sure you've installed the optional wireless LAN module, as described on page 79. Then follow the steps in this chapter to use Quick Wireless Connection (Windows only) or configure your projector and network. See the *EasyMP Network*

Projection Operation Guide for instructions on installing the software. The guide also contains instructions on using the software to project over the network.

Connecting to a Wired Network

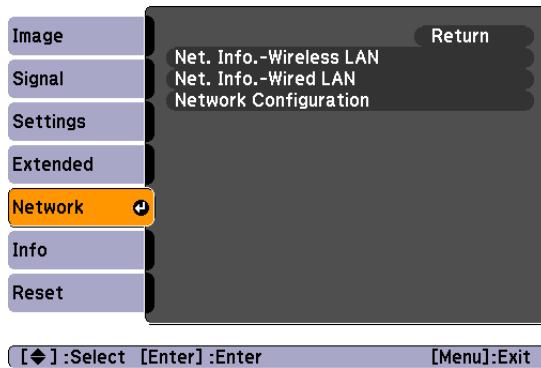

With a shielded, Category-5 Ethernet cable, you can connect the projector to your network and configure it with an IP address. You can then project from multiple computers on your network without changing any cables.

1. Connect the projector to your network using a commercially available 100BaseTX or 10BaseT network cable. Connect the cable to the LAN port on the projector as shown.

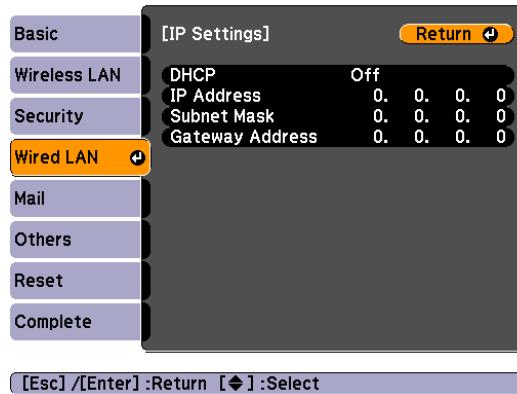

2. Connect the other end to your Ethernet hub or router.
3. Point the remote control at the projector and press the O power button.
4. Press the LAN button on the remote control to select network as the source.

5. Press the **Menu** button on the remote control, select the **Network** menu, then press **Enter**.

6. Choose **Network Configuration** and press **Enter**.
7. Select the **Wired LAN** menu and press **Enter**.
8. Choose **IP Settings** and press **Enter**. You see a screen like the following:

9. Do one of the following:
 - If your network assigns addresses automatically, turn on the **DHCP** setting.
 - If your network does not assign addresses automatically, turn off **DHCP** and enter the projector's **IP Address**, **Subnet Mask**, and **Gateway Address**, as needed.

To enter numbers, use the arrow buttons on the remote control to select each number on the screen, then press the **Enter** button. When you're finished entering an address in the network menu, highlight **Finish**, then press the **Enter** button.

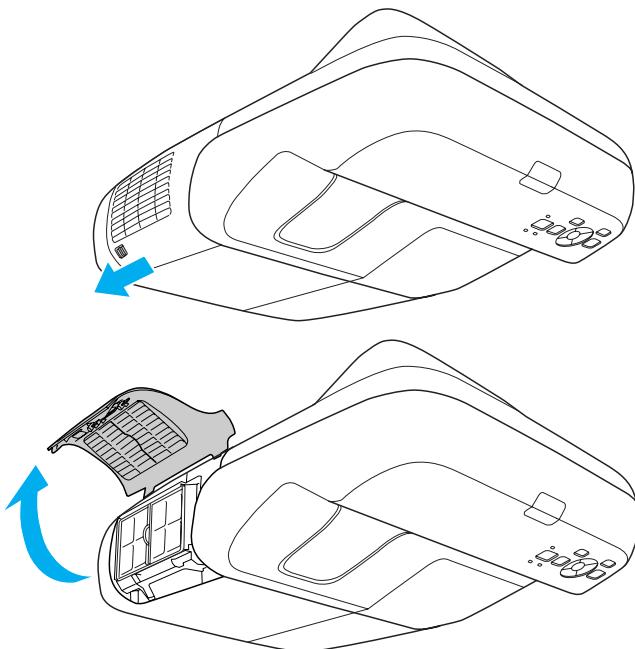

10. To prevent the IP address from appearing on the standby screen, set the **IP Address Display** setting to **Off**.
11. When you're done making all necessary changes, select **Complete** and press the **Enter** button to save your settings. Then press **Enter** again to confirm.

Press **Menu** to exit the menu system.

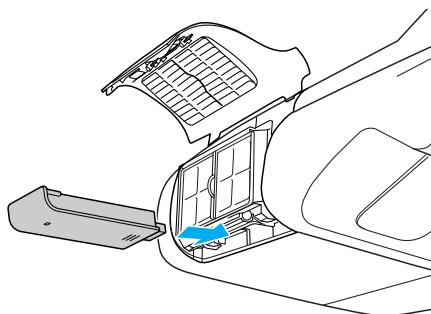

Installing the Optional Wireless LAN Module

Make sure you have the optional Wireless LAN Module. Turn off the projector and disconnect the power cord before you install the module.

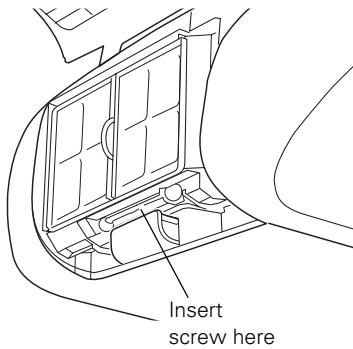

1. Open the air filter cover by sliding the switch and lifting the cover.

2. Insert the wireless LAN module as shown.

3. As a security feature, you can fasten the module using the screw that came with it.

4. Close the air filter cover.

If you have the optional USB key, you can use Quick Wireless connection as described in the next section. Or, you can configure your connection manually as described on page 81.

Using Quick Wireless Connection

Using the optional USB key, you can quickly connect the projector to a Windows computer wirelessly without any configuration.

First, make sure you have installed the wireless module as described on page 79 and turned on the projector.

1. Connect the USB key to the projector's TypeA (flat)  USB port.
2. When you see a projected message that the network information update is complete, remove the USB key.
3. Connect the USB key to a USB port on your computer or notebook.

In Windows 7 or Windows Vista, if you see the AutoPlay window, select **Run LaunchU3.exe**. When you see the User Account Control screen, click **Allow**.

4. Follow the instructions on the screen to install the Quick Wireless Connection driver.

If you see a Windows Firewall message, click **Yes** to disable the firewall.

After a few moments, your computer image will be displayed through the projector. If not, try restarting your computer.

5. When you're done with your presentation, remove the USB key. You may need to restart your computer to reactivate your wireless interface.

note

Do not attempt to write to the USB key or use it as a flash memory drive.

note

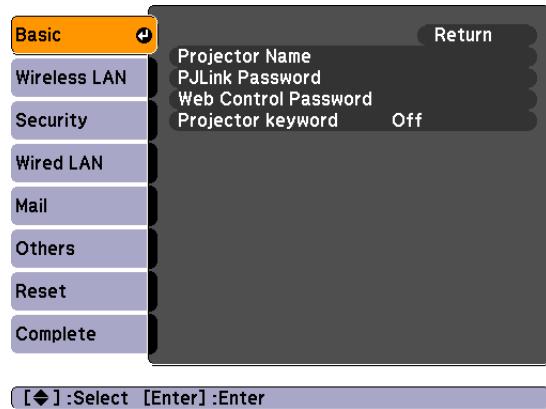

The Quick Wireless Connection utility will disable any other wireless sessions and adapter programs. Make sure you leave the USB key in your computer for your entire Quick Wireless Connection session.

Configuring Basic Settings

You can give your projector a unique name, enable a projector keyword, or create a password for controlling the projector over the Web.

1. Press the **Menu** button, then choose **Network** and press **Enter**.
2. Choose **Network Configuration** and press **Enter**.

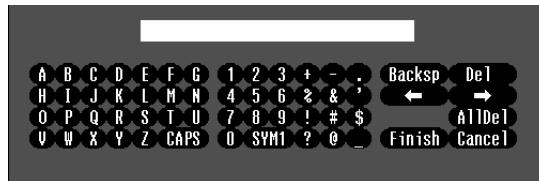

3. Choose **Basic** and press **Enter**. You see the following screen:

4. Make sure the projector has a unique name, so you can identify it on your network.

If you need to rename it, highlight the **Projector name** text box then press **Enter**.

5. Use the arrow buttons on the remote control to select individual letters; then press **Enter** to input a character. To add a blank space or to navigate backward and forward through the input text, highlight the arrows and press **Enter**. To toggle symbol settings or capital letters, highlight the option and press **Enter**. When you're done, highlight **Finish** and press **Enter**.

6. If you want to create a password for using PJLink to control the projector, highlight **PJLink Password**, press **Enter**, and enter a password of up to 8 alphanumeric characters. When you're done, highlight **Finish** and press **Enter**.

7. If you want to create a password for remote access to the projector, highlight **Web Control Password**, press **Enter**, and enter a password of up to 8 alphanumeric characters. When you're done, highlight **Finish** and press **Enter**.
8. If you want to set up a security keyword so that only people who are in the same room as the projector can access it, turn **Projector keyword** on. Then when you want to connect to the projector, it displays a randomized four-digit number or "keyword" on the screen. If you're using EasyMP Network Projection, you can enter the keyword on your computer to connect (see the *EasyMP Network Projection Operation Guide* for details).
9. When you're done making these settings, highlight the **Return** button at the top of the screen, then press **Enter**. Choose **Complete** and press **Enter**, then choose **Yes** and press **Enter** to save your settings.

note

Make sure you've installed the EasyMP Network Projection software as described in the EasyMP Network Projection Operation Guide.

Configuring the Connection

After you install the optional wireless LAN module, you can use the EasyMP Network Projection software to connect to the projector and send images wirelessly in two modes: Ad Hoc mode or Access Point mode.

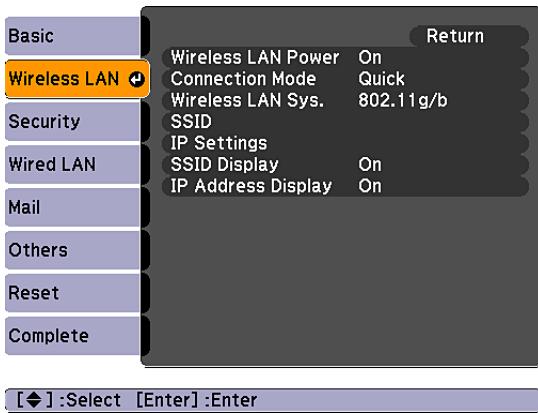

- **Ad Hoc mode** (computer-to-computer mode) lets you connect just one computer to the projector at a time; it's easy to set up, and the only equipment you need is a computer with a wireless (802.11g, 802.11b, or 802.11a) network card or adapter, or a Macintosh with an AirPort® or AirPort Extreme card. When you connect with this mode, any connection to other wireless networks is broken; you can connect to the projector only.
- **Access Point mode** (infrastructure mode) lets multiple computers access the projector at the same time and easily trade off control over the projector. To use Access Point mode, you need a wireless (802.11g, 802.11b, or 802.11a) access point or an AirPort Extreme (or AirPort) base station, and one or more computers with wireless network cards or adapters.

To connect to the projector over a wireless network, your computer must be running Windows 2000, XP, Vista, or Windows 7. Your Mac must be running Mac OS X 10.3 to 10.6.

Access Point mode (infrastructure mode) is required to achieve transfer speeds up to 54MB/sec on an 802.11g network. Ad Hoc mode (computer-to-computer mode) limits network connections to 11MB/sec. This is a standard specification of 802.11g networking.

Configuring the Projector

1. Press the **Menu** button, then choose **Network** and press **Enter**.
2. Choose **Network Configuration** and press **Enter**.
3. Choose **Wireless LAN** and press **Enter**. You see this screen:

4. Make sure **Wireless LAN Power** is set to **On**. You can turn it off to prevent unauthorized access.
5. Select one of the following connection modes:
 - **Quick** mode lets you easily connect one computer to the projector at a time. You can also select this setting when you're using the optional Epson Quick Wireless Connection USB key.
 - **Advanced** mode lets multiple computers access the projector at the same time and easily trade off control of the projector. This method requires a wireless network access point or an AirPort Extreme (or AirPort) base station.
6. If your network is using 802.11a, use the arrow buttons on the remote control to highlight **802.11a**, then press **Enter** to select it.

7. Highlight the **SSID** text box, press **Enter**, and enter the name you want to assign to the projector (Quick mode), or the name of your existing wireless network (Advanced mode):

Use the arrow buttons to select individual letters; then press **Enter** to input a character. To add a blank space or to navigate backward and forward through the input text, highlight the arrows and press **Enter**. To toggle symbol settings or capital letters, highlight the option and press **Enter**. When you're done, highlight **Finish** and press **Enter**.

Note that the SSID is case-sensitive (if you enter the name in uppercase on the projector, you must type it the same way on the computer connecting to the projector).

8. Select **IP Settings** and do one of the following:

- If your network assigns addresses automatically, turn on the **DHCP** setting.
- If your network does not assign addresses automatically, turn off **DHCP** and enter the projector's **IP Address**, **Subnet Mask**, and **Gateway Address**, as needed.

To enter numbers, use the arrow buttons on the remote control to select each number on the screen, then press the **Enter** button. When you're finished entering an address in the network menu, highlight **Finish**, then press the **Enter** button.

9. If you want to prevent the SSID from being displayed on the standby screen, set the **SSID Display** option to **Off**.
10. To prevent the IP address from appearing on the standby screen, set the **IP Address Display** setting to **Off**.

note

For specific details about your network, please consult your network administrator.

If you're using AirPort, start the AirPort Admin utility, select your base station and click Configure. Then click the Network tab to see your base station's IP address.

- When you're done making these settings, press Esc. Highlight the Return button at the top of the screen, then press Enter. Choose Complete and press Enter, then choose Yes and press Enter to save your settings.

Now you're ready to select the wireless network your computer, as described below.

Selecting Wireless Network Settings in Windows

note

Settings may vary, depending on your wireless network adapter. See the documentation for your adapter for more information.

Before connecting to the projector, select the correct wireless network on your computer.

- To access your wireless utility software, double-click the network icon on the Windows taskbar.
- Do one of the following:
 - If your projector is set up on an existing network (Advanced mode), select the network name (SSID).
 - If your projector is configured for Quick mode, select the SSID you assigned to the projector.
- Click Connect.

Now you're ready to connect to the projector. See the *EasyMP Network Projection Operation Guide* for details.

Selecting Wireless Network Settings in Mac OS

Before connecting to the projector, select the correct wireless network on your computer.

- Click the AirPort icon on the menu bar at the top of the screen.
- Make sure AirPort is turned on, then do one of the following:
 - If your projector is set up on an existing network (Advanced mode), select the network name (SSID).
 - If your projector is configured for Quick mode, select the SSID you assigned to the projector.

Using Wireless Security Options

The projector includes WEP and WPA data encryption security options which you can enable for network projection.

Make sure the settings you select match the ones used by your network; follow the directions from your network administrator.

See the following sections to enable security options on your projector:

- “Enabling WEP Encryption” below
- “Enabling WPA Security” on page 89

You also need to enable security settings from EasyMP Network Projection (see page 90).

note

The authentication and firewall features are only effective when the access point for the connection destination supports the same functions.

Enabling WEP Encryption

1. Press **Menu** on the projector remote. Highlight **Network** and then press **Enter**.
2. Choose **Network Configuration** and press **Enter**.
3. Highlight **Security**, then press **Enter**. You see the following screen:

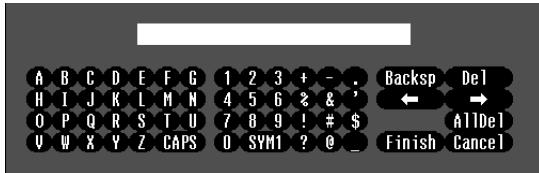

4. Press **Enter** to select **Security**, then select **WEP** and press **Enter**.

5. For the WEP encryption setting, select **128Bit** or **64Bit** and press **Enter**.
6. For Format, highlight **ASCII** to enable text input or **HEX** to enable hexadecimal input, then press **Enter**.
7. If you chose **64Bit**, choose **Encryption key 1, 2, 3, or 4**.

note

Text input for WEP encryption varies with different access points; check with your network administrator. Try ASCII first. If that doesn't work, try Text2 and then Text3.

Highlight the **Encryption key** text box that corresponds to the Key ID you selected, then press **Enter**. Use the arrow buttons to select individual letters; then press **Enter** to input a character. To add a blank space or to navigate backward and forward through the input text, highlight the arrows and press **Enter**. To toggle symbol settings or capital letters, highlight the option and press **Enter**. When you're done, highlight **Finish** and press **Enter**.

8. Check with your network administrator for directions on entering a key for your network, and follow these general guidelines:
 - For 128 bit WEP encryption with hexadecimal input, enter 26 characters, from 0 to 9 and from A to F.
 - For 64 bit WEP encryption with hexadecimal input, enter 10 characters, from 0 to 9 and from A to F.
 - For 128 bit WEP encryption with ASCII or text input, enter 13 alphanumeric characters.
 - For 64 bit WEP encryption with ASCII or text input, enter 5 alphanumeric characters.
9. For Authentication Type, select **Open** or **Shared**, depending on the setting your network uses.
10. When you're done making these settings, press **Esc**. Highlight the **Return** button at the top of the screen, then press **Enter**. Choose **Complete** and press **Enter**, then choose **Yes** and press **Enter** to save your settings.

Enabling WPA Security

1. Press **Menu**. Highlight **Network** and then press **Enter**.
2. Choose **Network Configuration** and press **Enter**.
3. Highlight **Security**, then press **Enter**. You see the following screen:

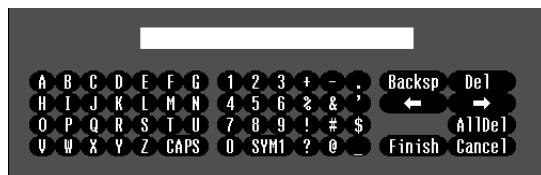

4. Press **Enter** to show the menu, then choose one of the following and press **Enter**.
 - WPA-PSK (TKIP)
 - WPA-PSK (AES)
 - WPA2-PSK (TKIP)
 - WPA2-PSK (AES)
5. Press **Esc** to return to the previous screen.
6. Highlight the **PSK** (pre-shared key) text box and press **Enter**. Use the arrow buttons to select individual letters; then press **Enter** to input a character. To add a blank space or to navigate backward and forward through the input text, highlight the arrows and

note

If the password is longer than 32 characters, enter it by accessing the projector from a web browser. This lets you enter up to 63 characters. See page 94 for details.

press **Enter**. To toggle symbol settings or capital letters, highlight the option and press **Enter**. When you're done, highlight **Finish** and press **Enter**.

7. When you're done making these settings, press **Esc**. Highlight the Return button at the top of the screen, then press **Enter**. Choose **Complete** and press **Enter**, then choose **Yes** and press **Enter** to save your settings.

Enabling Data Encryption from EasyMP Network Projection

When using the EasyMP Network Projection software, follow these steps to enable data encryption.

1. Click **Set options** on the main screen.
2. Click the **General Settings** tab.
3. Select the **Encrypt communications** checkbox.
4. Click **OK**.

For more information, see the *EasyMP Network Projection Operation Guide*.

Using the EasyMP Software

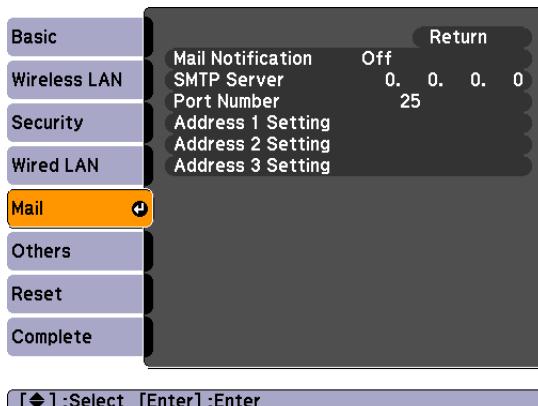

Once you've set up your projector and computer for network projection, see the *EasyMP Network Projection Operation Guide* for instructions on the following EasyMP features:

- Starting EasyMP Network Projection
- Projecting over the network (content over IP)
- Multi-screen projection
- Using Presentation mode
- Connecting to a projector on a different subnet

Using Projector E-mail Alerts

When this feature is enabled, the projector sends you an e-mail alert if it has any problems.

1. Press the **Menu** button on the remote control, select the **Network** menu, then press **Enter**.
2. Choose **Network Configuration** and press **Enter**.
3. Choose **Mail**, then press **Enter**. You see the following screen:

4. Highlight **On** to receive email notifications, then press **Enter**.
5. Press **Esc** to return to the previous menu.

note

If a critical problem develops with a projector which causes it to suddenly stop working, it may not be possible for the projector to send a message.

If Standby Mode is set to Communication ON in the Extended menu, the projector can still be monitored even if the projector is in standby mode (when the power is off).

6. Enter the IP address for the SMTP server for the projector.
You can enter a number from 0 to 255 in each field of the address. However, the following IP addresses cannot be used: 127.x.x.x, 224.0.0.0 to 255.255.255.255 (where x is a number from 0 to 255).
7. Enter the SMTP server's port number. The default value is 25.
You can enter a numeric value from 1 to 65535.
8. Choose one of the **Address** fields, then enter the e-mail address and the contents of the message that you will receive when a problem or warning occurs. You can register up to three addresses. You can enter up to 32 alphanumeric characters for the e-mail address.

When the selected problem or warning occurs, an e-mail message is sent to the specified notification addresses. The subject line of the e-mail is **EPSON Projector**.

The e-mail includes the following information:

- Line 1: The name of the projector where the problem has occurred
- Line 2: The IP address of the projector where the problem has occurred
- Line 3: Details of the problem

Using SNMP to Monitor the Projector

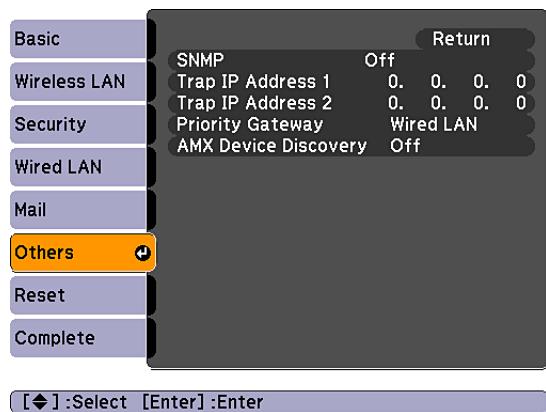

note

If you're a network administrator, you can use the SNMP option to enter a trap IP address. This lets you receive trap alerts for the projectors you're monitoring.

Network administrators can use SNMP (Simple Network Management Protocol) to monitor projectors.

1. Press the **Menu** button on the remote control, select the **Network** menu, then press **Enter**.
2. Choose **Network Configuration** and press **Enter**.

3. Choose **Others**, then press **Enter**. You see the following screen:

4. Turn on the SNMP setting.
5. Enter up to two IP addresses for notification.

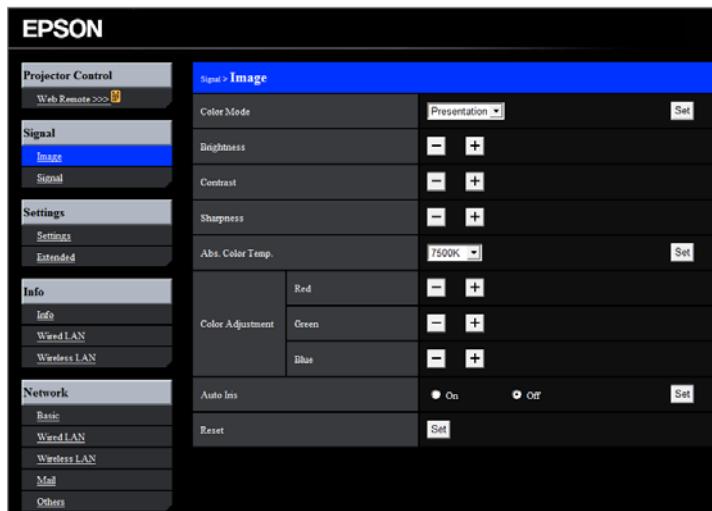

You can enter a number from 0 to 255 in each field of the address. However, the following IP addresses cannot be used: 127.x.x.x, 224.0.0.0 to 255.255.255.255 (where x is a number from 0 to 255).

6. For **Priority Gateway**, select **Wired** or **Wireless**.
7. If your network environment uses an AMX controller, select **ON** to allow the projector to be detected by AMX Device Discovery.

Using a Browser to Control the Projector

You can use a standard web browser to monitor and control the projector through the network. Because you can use your computer's keyboard, you may find it easier to make network settings using your browser than using the projector's remote control.

1. Make sure the projector is set up for your network, as described on page 76. (Standby Mode in the Extended menu should be set to **Communication On** to monitor the projector in standby mode.) When using a browser to access the projector, you cannot connect through a proxy server.
2. Open your web browser and enter the IP address of the projector you want to monitor in the browser window.
If you're not sure what the address of the projector is, turn the projector on and select **Net. Info.-Wired LAN** or **Net. Info.-Wireless LAN** from the Network menu to display the IP address of the projector. Do not enter leading zeroes.
3. Press **Enter**, or, if you set a Web control password in the projector's Network menu, enter your user name and password, then press **Enter**. You see a screen like the following:

- Select one of the menu options listed on the screen, then change any of the settings as needed. These settings correspond to those found in the projector's menu system.

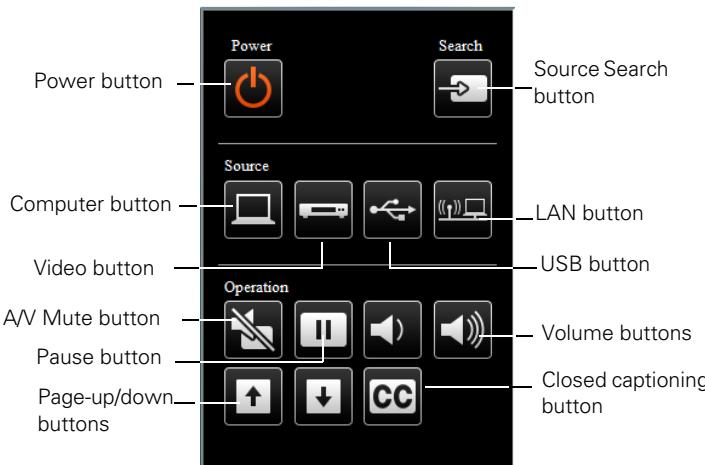

You cannot change the following settings using a web browser:

- Pointer Shape, Pattern, or User Button in the Settings menu
- User's Logo, High Altitude Mode, and Language in the Extended menu
- Reset All and Reset Lamp Hours in the Reset menu
- Password protection

Using Web Remote Control

When you access the projector through your browser, you can display a “virtual remote control” on your computer screen. This lets you change sources and perform many of the same functions as you can with the physical remote control.

From the Projector Control menu, select **Web Remote**. You see the following screen:

- The **Power** button turns the projector on and off.
- The **Search** button searches for signal sources (see page 28).

- The Computer button selects a computer signal (connected to the Computer1 or Computer2 port).
- The Video button selects a video signal (connected to the Video or S-Video port).
- The LAN button selects a network signal or wireless signal (using the optional wireless unit).
- The USB button selects USB computer display (see page 44) or a signal from equipment connected to the TypeA  (flat) USB port, such as a document camera (see page 57).
- The Pause button stops the image (see page 35).
- A/V Mute button temporarily turns off the picture and sound (see page 34).
- The Page Up/Down buttons control PowerPoint slides (requires USB cable. See page 38).
- The Volume buttons raise or lower the audio volume.
- The CC (Closed Captioning) button lets you display closed captioning for content that provides it.

6 Maintaining the Projector

Your projector needs little maintenance. All you have to do on a regular basis is clean the lens, and check that the air filter and vents are clean. A clogged air filter or vent can block ventilation needed to cool the projector.

warning

Before you clean any part of the projector, turn it off and unplug the power cord.

Never open any cover on the projector, except the lamp cover. Dangerous electrical voltages in the projector can injure you severely. Do not try to service this product yourself, except as specifically explained in this User's Guide. Refer all other servicing to qualified service personnel.

The only parts you should replace are the lamp and air filter. If any other part needs replacing, contact your dealer or a qualified servicer.

This chapter covers the following:

- Cleaning the projection window
- Cleaning the projector case
- Cleaning the air filter
- Replacing the air filter
- Replacing the lamp
- Replacing the remote control batteries
- Transporting the projector

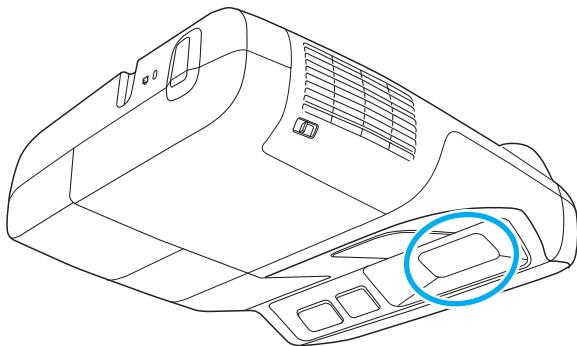

Cleaning the Projection Window

Clean the projection window whenever you notice dirt or dust on the surface.

caution

Do not rub the projection window with harsh materials or subject it to shocks, or you may damage the window.

Do not use wax, alcohol, benzene, paint thinner, or other chemical detergents. These can damage the case.

To remove dirt or smears on the window, use a commercially available cloth for cleaning glasses.

Cleaning the Projector Case

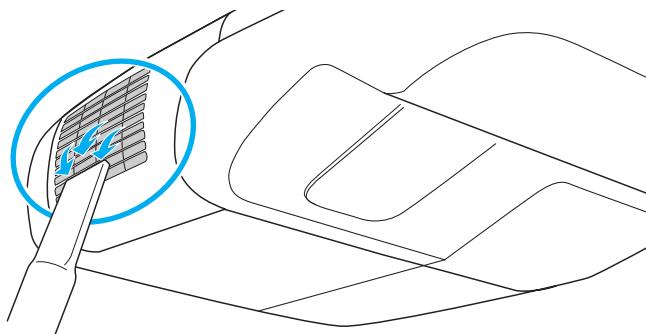

Before cleaning, turn off the projector and unplug the power cord.

- To remove dirt or dust, wipe the case with a soft, dry, lint-free cloth.
- To remove stubborn dirt or stains, moisten a soft cloth with water and a neutral detergent and firmly wring the cloth dry. Then wipe the case.

Cleaning the Air Filter

Your projector includes an air filter to ensure the best performance and help protect your equipment investment. If dust collects on the air filter, clean it as described here. Dust clogs prevent proper ventilation and can cause overheating, which can damage the projector.

1. Turn off the projector.
2. Remove dust from the air filter using a small vacuum cleaner designed for computer or office equipment, or gently clean the vent with a soft brush (such as an artist's paintbrush).

You can remove the air filter to clean both sides.

If the filter is too dirty or broken, replace the filter as described below.

note

To order replacement air filters, request part number V13H134A27. See page 19 for ordering information.

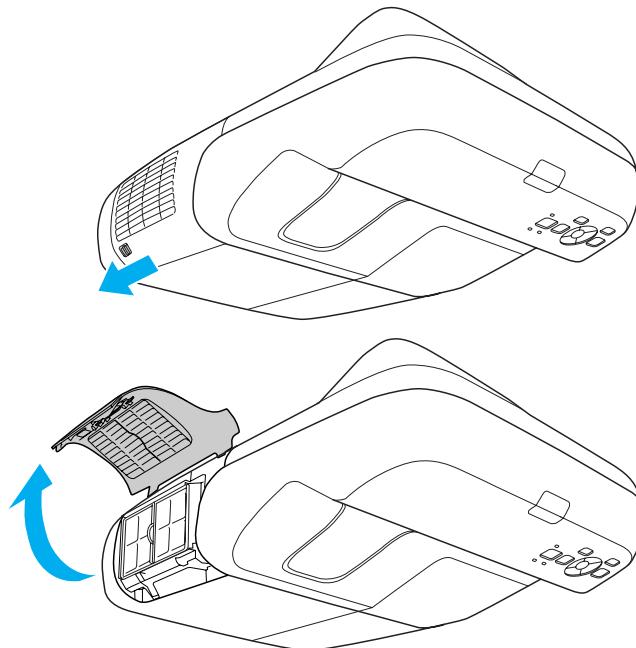

Replacing the Air Filter

You need to replace the air filter if:

- You cannot remove the dust from it
- The air filter is damaged or torn
- You repeatedly see a projected message telling you to clean or replace it

Contact your dealer or call Epson at 800-GO-EPSON (800-463-7766) to obtain a new air filter. Request part number V13H134A27.

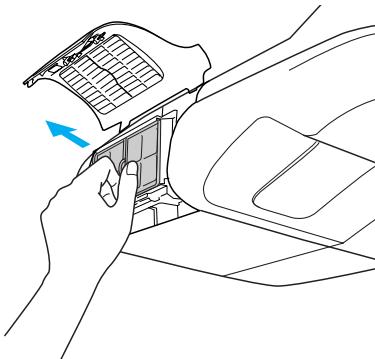

1. Turn off the projector and unplug the power cord.
2. Slide the switch, then open the air filter cover on the side of the projector.

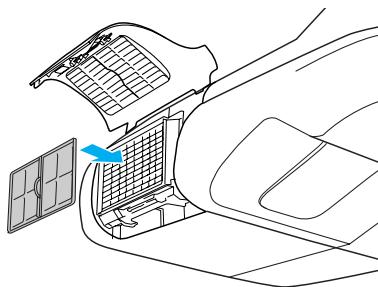

note

Air filters contain polycarbonate, ABS resin, and polyurethane foam. Dispose of used air filters according to local regulations.

3. Grasp the tab and pull the air filter straight out as shown.

4. Press in the new air filter until it clicks into place.

Replacing the Lamp

The life span of the projection lamp is about 2500 hours if Power Consumption in the Settings menu is Normal (default), and 3500 hours if this setting is ECO. See page 105 to check the lamp usage.

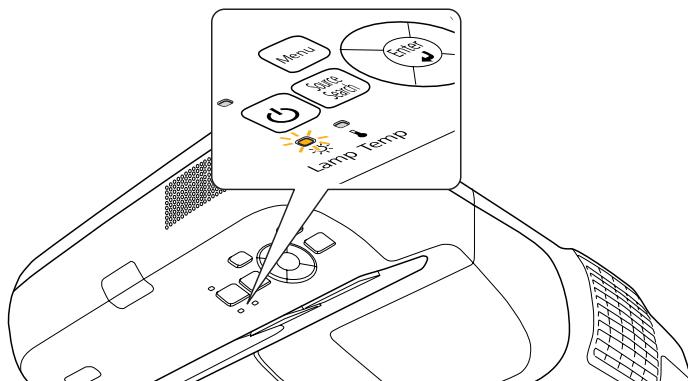

It is time to replace the lamp when:

- The projected image gets darker or starts to deteriorate.
- The message Replace the lamp appears on the screen and the Lamp light flashes orange. To maintain projector brightness and image quality, replace the lamp as soon as possible.

You may also need to replace the lamp if the Lamp light flashes red. See page 111.

note

Turn off this product when not in use to prolong the life of the projector.

Contact your dealer or call Epson at 800-GO-EPSON (800-463-7766). Request part number V13H010L57.

warning

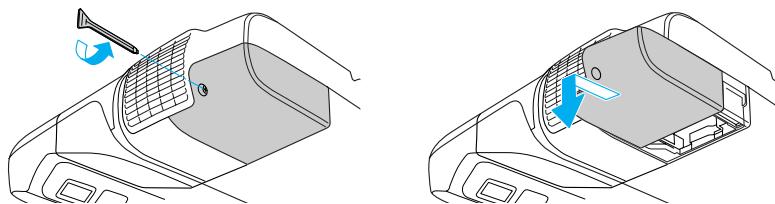

Let the lamp cool fully before replacing it.

In the unlikely event that the lamp has broken, small glass fragments may be present and should be removed carefully to avoid injury. If the projector has been installed on the ceiling, you should stand to the side of the lamp cover, not underneath it.

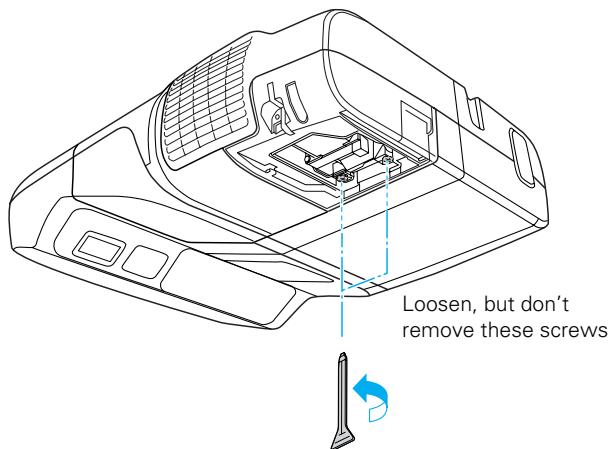

If the lamp is used after the replacement period has passed, the possibility that the lamp may break increases. When a lamp replacement message appears, replace the lamp with a new one as soon as possible, even if it is still working.

Follow these steps to replace the lamp:

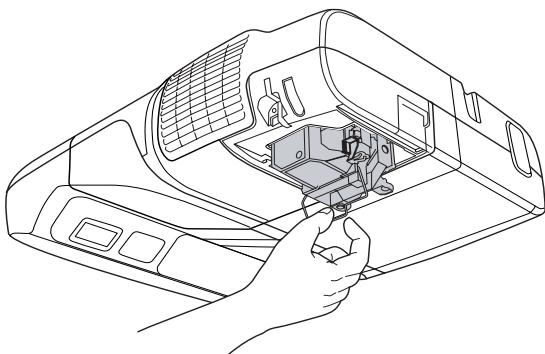

1. Turn off the projector and unplug the power cord.
2. Let the projector cool for at least an hour (if it has been on). The lamp is extremely hot immediately after use.
3. Loosen the lamp cover screw (you cannot remove it). Then slide the lamp cover off.

4. Loosen the two screws holding the lamp in place (you can't remove them).

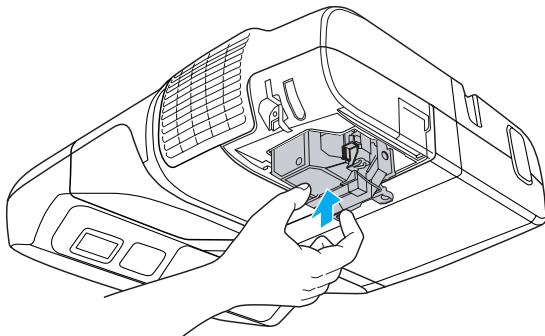

5. Grasp the lamp handle as shown and pull it straight out.

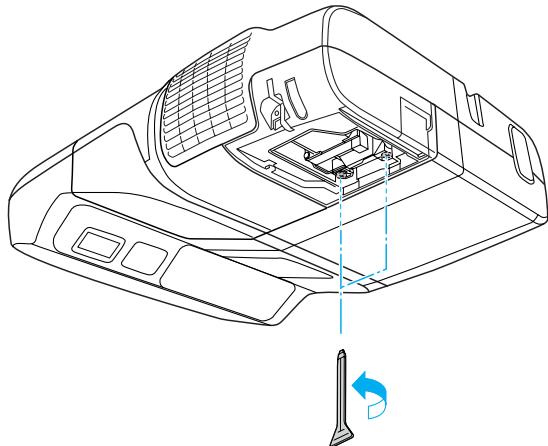

note

(Hg) The lamp(s) in this product contain mercury. Please consult your state and local regulations regarding disposal or recycling. Do not put in the trash.

6. Gently insert the new lamp along the guide rail, then push it in place.

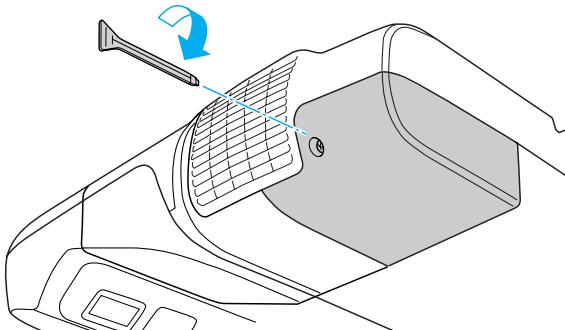

7. Tighten its screws, then press it in by the handle until it clicks into place.

8. Replace the lamp cover, then tighten its screw.

note

Tighten the lamp cover securely so you do not receive a lamp cover error when you turn the projector back on.

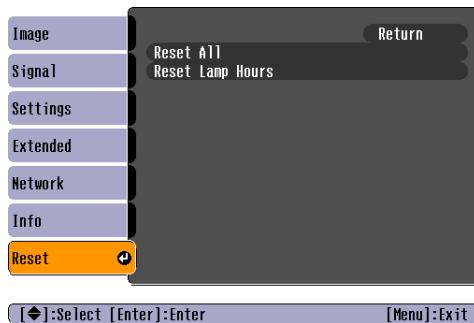

9. Reset the lamp timer as described in the next section.

Resetting the Lamp Timer

After you replace the lamp, you need to reset the lamp timer using the projector's menu system.

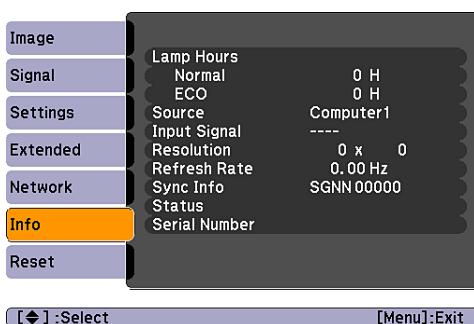

1. Press the **Menu** button on the remote control or on the projector's control panel. You see the main menu.
2. Select the **Reset** menu and press **Enter**. You see this screen:

3. Select **Reset Lamp Hours** and press **Enter**.
4. When you see the prompt, select **Yes** and press **Enter**.
5. When you're finished, press **Menu** to exit.

Checking Lamp Usage

To check the number of hours the lamp has been used, press the **Menu** button and highlight the **Info** menu. You see a screen like this:

note

The information displayed depends on the input signal currently selected.

If you have used the projector for less than 10 hours, the hours are listed as 0H.

The life span of the lamp is about 2500 hours if **Power Consumption** in the Settings menu is **Normal** (default), and 3500 hours if this setting is **ECO**. Make sure you have a spare lamp handy if the usage hours on this menu are close to the life span of your lamp.

Replacing the Remote Control Batteries

caution

When replacing batteries, take the following precautions:

■ Replace the batteries as soon as they run out. If the batteries leak, wipe away battery fluid with a soft cloth. If fluid gets on your hands, wash immediately.

■ Do not expose batteries to heat or flame.

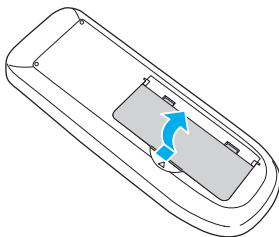

■ Dispose of used batteries according to local regulations.

■ Do not use batteries other than those specified in this User's Guide and do not use batteries of different types or mix old and new batteries.

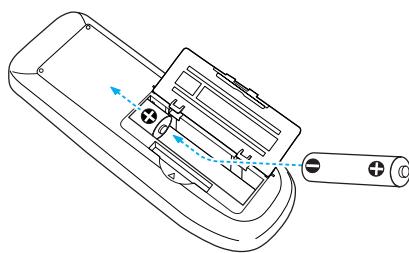

■ Keep these batteries out of the reach of children. Batteries are choking hazards and are very dangerous if swallowed.

Replace the batteries in the remote as described below:

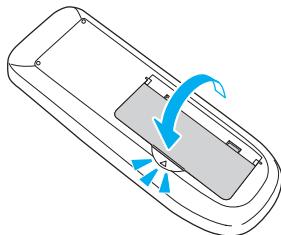

1. Turn the remote control over.
2. Press in on the catch on the battery cover as you lift the cover off.

3. Install two AA alkaline batteries, inserting the + and - ends as shown.

4. Replace the battery cover and press it down until it clicks into place.

Transporting the Projector

The projector contains many glass and precision parts.

Follow these guidelines to prevent damage when transporting it:

- When shipping the projector for repairs, use the original packaging material if possible. If you do not have the original packaging, use equivalent materials, placing plenty of cushioning around the projector.
- When transporting the projector a long distance, first place it in a hard-shell shipping case, then pack it in a firm box with cushioning around the case.

note

Epson shall not be liable for any damages incurred during transportation.

7

Solving Problems

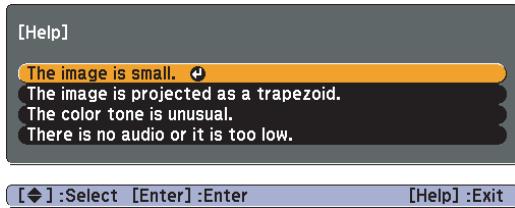

This chapter helps you solve problems with your projector and tells you how to contact technical support for problems you can't solve yourself. The following information is included:

- Using the projector's on-screen help system
- What to do when the projector's status lights flash
- Solving projector operation problems
- Solving problems with the image or sound
- Solving problems with the remote control
- Contacting technical support

Using On-Screen Help

If the image doesn't look right or your audio isn't working, you can get help by pressing the ? Help button on the projector or the remote control.

1. Press the ? Help button on the remote control or on the projector. You see the Help menu:

2. Use the arrow buttons on the remote control or the projector to highlight menu items.
3. Press the Enter button on the remote control or the projector to select the menu item and read the solutions.
4. To exit the help system, press the ? Help button or Esc button.

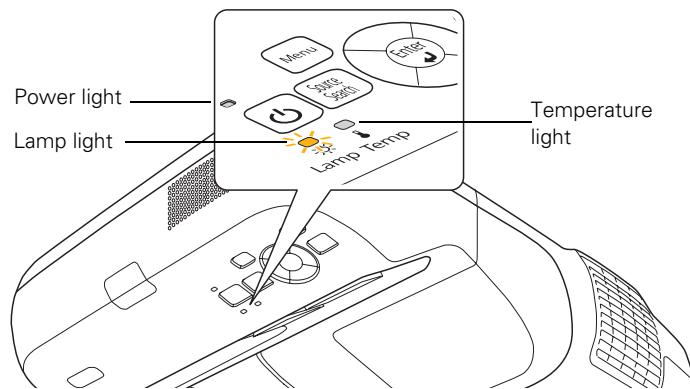

If none of the suggestions solve your problem, see additional solutions to problems in the following sections.

Checking Projector Status

If your projector isn't working correctly, first turn it off and unplug it. Then plug the power cord back in and turn on the projector. If this doesn't solve the problem, check the lights on top of the projector.

What To Do When the Lights Flash

The lights on top of the projector indicate the projector's status.

Refer to the following tables for a complete description of the projector's status lights:

Power light status

Power light status	Description
Flashing green	The projector is warming up. Wait for the image to appear.
Green	The projector is operating normally.
Orange	The projector is in sleep or standby mode. You can unplug it or press the power button to turn it on.
Flashing orange	Preparing for network monitoring or cooling down.
Red or flashing red	There is a problem with the projector. Check the next table to diagnose the problem.

Error light(s) status

Error light(s) status	Description
 Green or orange  Flashing orange  Off	<p>It's time to replace the lamp. See page 101 for instructions. If you continue to use the lamp after the replacement warning, there is an increased possibility that the lamp may break.</p>
 Flashing red  Off  Flashing orange	<p>Rapid cooling is in progress. Although this is not an abnormal condition, projection will stop automatically if the temperature rises higher. Make sure there is plenty of space around and under the projector for ventilation, and that the air filter and vents are clean.</p>
 Red  Off  Red	<p>The projector is overheating, which turns the lamp off automatically. Wait until the projector switches to standby mode (about 5 minutes). Make sure there is plenty of space around and under the projector for ventilation.</p> <p>The air filter may be clogged. Clean or replace the air filter as described on pages 99 to 101.</p> <p>If you're using the projector above an altitude of 4,900 feet (1,500 meters), turn on High Altitude Mode in the Operation menu (see page 68).</p> <p>If the projector continues to overheat after you clean the air filter, stop using the projector, disconnect the power cord, and contact Epson for help as described on page 124.</p> <p>Warning: Except as specifically explained in this <i>User's Guide</i>, do not attempt to service this product yourself.</p>
 Flashing red  Red  Flashing red	<p>The projector has an internal problem. Stop using the projector, disconnect the power cord, and contact Epson for help, as described on page 124.</p>
 Red  Off  Flashing red	<p>There is a problem with the fan or temperature sensor. Stop using the projector, disconnect the power cord, and contact Epson as described on page 124.</p>
 Red  Flashing red  Off	<p>The lamp may be burnt out. First make sure the lamp cover is securely installed. If that's not the problem, the air filter may be clogged. Clean or replace the air filter as described on pages 99 to 101.</p> <p>If this does not resolve the problem, let the lamp cool and then remove it. If the lamp is cracked, replace it as described on page 101. If the lamp is not cracked, reinstall it. If reinstalling doesn't work, replace the lamp.</p> <p>If you're using the projector above an altitude of 4,921 feet (1,500 meters), turn on High Altitude Mode in the Operation menu (see page 68).</p> <p>If none of these suggestions resolves the problem, contact Epson as described on page 124.</p>
 Flashing red  Flashing red  Flashing red	<p>The projector has an Auto Iris error or power error. Stop using the projector, disconnect the power cord, and contact Epson for help, as described on page 124.</p>

Solving Projector Operation Problems

The power doesn't turn on.

- If the projector doesn't turn on when you press the \textcircled{P} power button, make sure the power cord is connected to the projector and plugged into a working electrical outlet.
- The power cord may be defective. Disconnect the cord from the outlet and contact Epson as described on page 124.
- If you're using the Direct Power On function and you immediately plug the power cord back in after unplugging it, the power may not turn back on. Press the \textcircled{P} power button to turn the projector back on.

The buttons on the projector don't work.

If the Control Panel Lock function has been enabled, you can't use the buttons on the projector. Try using the remote control instead, or press and hold the projector's **Enter** button for seven seconds to release the lock (see page 73).

You are having trouble projecting through the USB cable connection.

- If the USB Display driver is not installed automatically the first time you connect the cable, do one of the following:

Windows: Double-click **My Computer > EPSON_PJ_UD > USB_Display_Installer.EXE**.

Mac OS: Double-click **EPSON_PJ_UD > USB_Display_Installer.EXE**.

- If nothing is projected after the drivers are installed, do one of the following:

Windows: Select **All Programs > EPSON Projector > EPSON USB Display > EPSON USB Display Vx.x**.

Mac OS: Click the **USB Display** icon in the Dock. If you don't see it, start **USB Display** from the Applications folder.

- Make sure **USB Type B** in the Extended menu is set to **USB Display** (see page 68).
- In Windows, if the mouse pointer flickers, select All Programs > EPSON Projector > EPSON USB Display > EPSON USB Display Vx.x., then clear the Transfer layered window checkbox.

Solving Problems With the Image or Sound

No image appears on the screen.

- Check that the \textcircled{P} power light is green and not flashing. Also press the **A/V Mute** button on the remote control to make sure the picture has not been turned off temporarily.
- The projector may be in standby or sleep mode. If the \textcircled{P} power light is orange, press the \textcircled{P} power button to turn the projector on.
- If the power was switched off and then on again, the projector may be cooling down. Wait until the \textcircled{P} power light stops flashing and remains orange; then press the \textcircled{P} power button again.
- The attached computer may be in sleep mode or displaying a black screen saver. Try pressing a key on the computer.
- If you are projecting from a DVD player or other video source, make sure you turn it on and press its **Play** button.
- If you are projecting video from a laptop, you may need to set the laptop to external output only.
- If you are projecting from a composite or S-Video video source, make sure the Video Signal setting is correct (see page 63).
- You can also try resetting all of the menu settings (see page 61).

You've connected a computer and see a blue screen with the message No Signal displayed.

- Make sure the cables are connected correctly, as described beginning on page 44.
- If you've connected a computer and one or more video sources, you may need to press the **Source Search** button to select the correct source. Allow a few seconds for the projector to sync up after pressing the button.
- Make sure the power for your connected equipment is turned on.

If you're using a PC notebook:

- Hold down the **Fn** key on the keyboard and press the function key that lets you display on an external monitor. It may have an icon such as /□, or it may be labelled **CRT/LCD**. Allow a few seconds for the projector to sync up after pressing it. Check your notebook's manual or online help for details.

On most systems, the /□ key lets you toggle between the LCD screen and the projector, or display on both at the same time.

If you connect the notebook while the projector or computer are already turned on, the function **Fn** key that changes the computer's image signal to external output may not work. Turn the computer and the projector off and then back on again.

- Depending on your computer's video card, you might need to use the **Display** utility in the Control Panel to make sure that both the LCD screen and external monitor port are enabled. See your computer's documentation or online help for details.

If you're using Mac OS X:

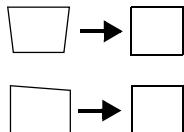

1. Open **System Preferences**.
2. Click **Displays**.
3. Click **Detect Displays**.
4. Make sure the **VGA Display** or **Color LCD** dialog box is selected.
5. Click the **Arrangement** or **Arrange** tab.
6. Make sure the **Mirror Displays** checkbox is selected.

The message Not Supported is displayed.

- Make sure the correct input signal is selected in the Signal menu (see page 63).
- Make sure your computer's resolution and frequency or refresh rate is supported by the projector (see page 130). If necessary, change your computer's settings.

Only part of the computer image is displayed.

- Press the **Auto** button on the remote control or the **Enter** button on the projector.
- Make sure the image **Position** setting is correct in the Signal menu. See page 64 for more information.
- Press the **Aspect** button on the remote control or select the correct **Aspect** setting from the Signal menu. See page 31 for details on the available options.
- Press the **Esc** button on the remote control to cancel the E-Zoom function.
- Make sure your computer's resolution setting is correct. See the compatible video formats listed on page 130.
- You also may need to modify existing presentation files if you created them for a different resolution. See your software documentation for specific information.
- If you're projecting a widescreen computer image, adjust the **Resolution** setting (see page 63), if necessary.
- If you're projecting an image from a computer with dual display activated, turn dual display off.

The image isn't square, but keystone-shaped.

If the image isn't evenly rectangular, adjust its shape using the **Keystone** setting on the **Settings** menu (see page 65) .

The image contains static or noise.

- If you're using a computer cable longer than 6 feet (1.8 meters), or an extension cable, the image quality may be reduced.
- Keep your computer and video cables away from the power cord as much as possible to prevent interference.
- The video signal may be split between the computer and the projector. If you notice a decline in the projected image quality when the image is displayed simultaneously on your notebook computer and the projector, turn off the notebook's LCD display.
- Make sure the correct input signal is selected in the Signal menu (see page 64).
- If you're using a composite, S-Video, or component video source with 480i signals, turn on the **Progressive** setting on the Signal menu (see page 64).
- If you've used the Keystone adjustment, you may need to decrease the **Sharpness** setting in the Image menu (see page 62).
- If you're projecting from a computer, make sure its signal is compatible with the projector. See page 130.
- If you're projecting from a computer, press the **Auto** button on the remote control to reset the projector's Tracking, Sync, and Position settings

The image is blurry.

- There may be dirt or smears on the lens. Clean the lens as described on page 98.
- Adjust the focus using the focus lever (see page 29).
- Lower the projection angle to reduce the amount of keystone correction required.
- Make sure the projector is within the proper range (projection distance) from the screen (see page 22).
- Make sure the lens is not fogged by condensation. You may need to wait before using the projector after moving it from a cold environment to a warm environment.

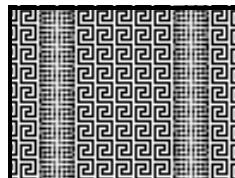

- If you're projecting from a computer, you may need to adjust the tracking and sync settings as described in the next section.

You see vertical bands or the image still looks blurry after trying the solutions in the previous section.

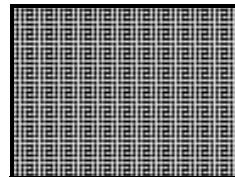

note

You must be projecting an image for the Auto button to have any effect. It works only with computer images projected through the Computer (Component Video) port.

- If you're projecting from a computer and displaying an image that contains a lot of fine detail, you may notice vertical bands or some of the characters may look heavy or blurred. Press the **Auto** button on the remote control or the **Enter** button on the projector to reset the projector's Tracking, Sync, and Position settings.
- If further adjustment is needed, you can fine-tune the **Tracking** and **Sync** settings manually using the Signal menu, as described on page 64.
 1. Fill the screen with an image containing fine detail, such as a pattern to appear as your desktop background, or try projecting black text on a white background.
 2. Adjust the **Tracking** to eliminate vertical bands.

3. Adjust the **Sync** setting to increase the image sharpness.

note

Because of the different technologies used, your projected image may not exactly match the colors on your notebook or computer monitor.

The image is too light or dark, or colors are incorrect.

- Press the **Color Mode** button or select a different **Color Mode** option in the **Image** menu. See page 30 for details on the available options.

- If you're displaying video, adjust the **Color Adjustment** and **Color Mode** settings on the Image menu. You can also try adjusting the **Color Saturation**, **Abs. Color Temp**, and **Tint** settings on the Image menu.
- Try adjusting the **Brightness** and **Contrast** settings on the Image menu.
- Try adjusting the **Power Consumption** setting (see page 65).
- Check your computer display settings to correct the color balance.
- The projector's lamp may need to be replaced. See page 101 for instructions.
- Make sure the correct input signal is selected in the Signal menu (see page 64).
- Make sure that all cables are connected to the proper ports and connected securely.

Nothing appears on an external monitor

The only images that can be displayed on an external monitor are computer images connected through the **Computer1** or **Computer2** port (see page 44).

There is no sound, or the sound is not loud enough.

- Use the **Volume** buttons to adjust the volume (see page 36), or adjust the **Volume** setting in the **Settings** menu.
- Make sure you are using a “no resistance” audio cable.
- Make sure A/V Mute is not enabled. (Press the **A/V Mute** button to disable it.)
- If your presentation includes computer audio, make sure the volume control on your computer is not turned all the way down or muted. In Windows, you may be able to check this by clicking the volume control in your Windows system tray (lower right corner of the screen). On a Mac, you may be able to adjust the volume from your menu bar (top right corner of the screen) or via the volume control function keys.

- If you're using a DVD player or other video source, make sure the cables are connected correctly, as described on page 53.
- If you are using a microphone connected to the projector's Mic port, make sure the cable is connected securely and the **Mic Input Volume** on the Settings menu is adjusted correctly. See page 65 for more information.

Solving Password Problems

If you cannot enter or remember a password, try the following solutions:

- You may have turned on password protection without first setting a password. Try entering 0000 using the remote control.
- If you have entered an incorrect password too many times and see a message displaying a request code, write down the code and contact Epson as described on page 124.

Solving Network Problems

You can't display an image using Quick Wireless Connection.

You may need to restart your computer to connect.

You can't connect to the projector using EasyMP Network Projection.

- Make sure the network cable is connected, as described on page 76.
- If you are using the optional wireless LAN module, make sure it is installed correctly in the projector, as shown on page 79.
- Restart your computer.
- Make sure your projector and computer are configured correctly; see page 84 (configuring the projector) or page 86 (configuring the computer).

- If you are using the optional wireless LAN module, make sure that you have sufficient wireless signal strength (above 50 percent). On a Mac, check the AirPort icon on the Mac menu bar. In Windows, see the documentation for your computer's wireless card or adapter for details.
- Make sure you aren't projecting one of the EasyMP Network Projection screens. (You should see a message that the projector is ready to connect.) If you have to exit a configuration screen, restart EasyMP Network Projection.
- If the projector is configured for Access Point mode and you're using DHCP, allow time for your projector to appear. It takes the server a little while to pick up the IP address.
- If you've changed any settings for your projector or network, or restarted your computer, allow a minute or two for the connection to appear. If you're using AirPort, try turning AirPort off and then on again.
- Make sure that you're trying to connect to the right network. In Windows, verify that you've enabled your computer's connection to the access point or that your wireless card or adapter is enabled and connected to the same SSID as the projector. On a Mac, click the AirPort icon at the top of your Mac desktop to make sure AirPort is turned on and the right network is selected.
- If you have an access point or AirPort base station and you're not using DHCP, check your projector's IP address on the Access Point mode advanced settings screen. The first three segments of the IP address should be identical to the first three segments of the IP address of your access point or base station. The last segment of the projector's IP address should be close, but not identical, to the last segment of the IP address of the access point or base station.
- If you're not using DHCP, check your projector's Gateway address on the projector's Access Point mode advanced settings screen. It should be identical to the IP address for your access point or AirPort base station.

- If you're using a projector keyword, it changes each time you turn the projector off and then on again. Check the projector's keyword on the LAN standby screen and enter it at the prompt.
- If you're using AirPort, check the configuration of your network. Start the AirPort Admin utility, select your base station, click **Configure** and click **Show All Settings**. Click the **Network** tab. If you set up your projector to connect in DHCP mode, turn on **Distribute IP Addresses** and **Share a Single IP Address**.
- If you're using AirPort and DHCP is turned off on your projector's Access Point mode advanced settings screen, make sure **Distribute IP Addresses** is off.
- If you're using Access Point mode and you're connecting to the wrong network, you may be experiencing signal interference from another network. Try resetting your access point or base station, then restart EasyMP Network Projection.
- If you're using AirPort, the projector's SSID should match the AirPort network name, not the name of the AirPort base station. To check the network name, start the AirPort Admin utility, select your base station, and click **Configure**. Then click **Show All Settings**. The network name appears on the AirPort tab.
- If you're prompted for a password when you connect, enter the WEP encryption key (if you're using WEP encryption).

You are not receiving mail when a projector problem occurs.

- Make sure the Mail settings are correct in the Network menu. For details, see page 91.
- To receive mail notification when the projector is in standby mode, you need to set **Standby Mode** to **Communication On** in the Extended menu. See page 68.

Solving Problems With the Remote Control

The projector doesn't respond to remote control commands.

- Point the remote control towards the projector's receiver. Make sure you are within 19.7 feet (6 meters) of the projector and within a 30° horizontal angle and a 15° vertical angle from the projector's front or back receiver.
- The remote control's batteries may not be installed correctly or may be low on power. To change the batteries, see page 106.
- Dim the room lights and turn off any fluorescent lights. Make sure the projector is not in direct sunlight. Strong lighting, especially fluorescent lights, may affect the projector's infrared receivers. Also, turn off any nearby equipment that emits infrared energy, such as a radiant room heater.
- If you can't adjust the room lighting, you can turn off one of the remote receivers by using the Settings menu. Make sure the receivers are not both turned off (see page 66).
- Check to see if a button on the remote control is stuck down, causing it to enter sleep mode. Release the button to wake the remote.
- If you want to use the remote control as a wireless mouse (or to move through presentation slides), make sure **USB Type B** in the Extended menu is set to Wireless Mouse (see page 68). Also, make sure you have connected the USB cable.

Where To Get Help

Epson provides these technical support services:

Internet Support

Visit Epson's support website at www.epson.com/support and select your product for solutions to common problems. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

To use the Epson PrivateLine Support service, call (800) 637-7661 and enter the PIN on the included Epson PrivateLine Support card. This is the fastest way of speaking to a live representative, and it's free. This service is available 6 AM to 6 PM, Pacific Time, Monday through Friday, for the duration of your warranty period.

You may also speak with a projector support specialist by dialing one of these numbers:

- U.S.: (562) 276-4394, 6 AM to 6 PM, Pacific Time, Monday through Friday.
- Canada: (905) 709-3839, 6 AM to 6 PM, Pacific Time, Monday through Friday.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Before you call for support, please have the following information ready:

- Product name (PowerLite 450W or PowerLite 460)
- Product serial number (located on the bottom of the projector)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer or video configuration
- Description of the problem

Purchase Supplies and Accessories

You can purchase screens and other accessories from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at www.epsonstore.com (U.S. sales) or www.epson.ca (Canadian sales).

A

Technical Specifications

General

Type of display	Poly-silicon TFT active matrix
Resolution (native format)	PowerLite 450W 1280 × 800 pixels (WXGA) PowerLite 460 1024 × 768 pixels (XGA)
Color reproduction	16.8 million colors
Light output (brightness)	PowerLite 450W Normal mode: White light output 2500 lumens (ISO 21118 standard) Color light output 2500 lumens ECO mode: White light output 1740 lumens (ISO 21118 standard) Color light output 1740 lumens PowerLite 460 Normal mode: White light output 3000 lumens (ISO 21118 standard) Color light output 3000 lumens ECO mode: White light output 2080 lumens (ISO 21118 standard) Color light output 2080 lumens

Contrast ratio	2000:1 (Dynamic color mode, Normal Power Consumption, with Auto Iris setting turned on in the Image menu; see page 61)
Image size	PowerLite 450W (16:10 image) 59 to 97 inches (149.8 to 246.4 cm)
Projection distance	PowerLite 460 (4:3 image) 63 to 102 inches (160.0 to 259.1 cm)
Projection methods	PowerLite 450W (16:10 image) 18.3 to 30.1 inches (.465 to .766 m)
Internal sound system (monaural)	PowerLite 460 (4:3 image) 18.3 to 30.1 inches (.465 to .766 m)
Optical aspect ratio	front or rear ceiling mount
Zoom ratio	10 W
Noise level	PowerLite 450W 16:10 (horizontal:vertical)
Keystone correction	PowerLite 460 4:3 (horizontal:vertical)
	Digital 1:1.35
	28 dB in ECO mode
	35 dB in Normal mode
	±5°

Projection Lamp

note

Lamp life will vary depending upon mode selected, environmental conditions, and usage. Brightness decreases over time.

Turn off this product when not in use to prolong the life of the projector.

Type	UHE (Ultra High Efficiency E-TORL®)
Power consumption	230 W
Lamp life	Approx. 2500 hours (Normal mode) Approx. 3500 hours (ECO mode)
Part number	V13H010L57

Remote Control

Range	19.7 feet (6 meters)
Batteries (2)	Alkaline AA

Dimensions

Height	6.1 inches (155 mm)
Width	19 inches (483 mm)
Depth	14.5 inches (369 mm)
Weight	Approximately 12.6 lb (5.7 kg) without slide plate
	Approximately 13.8 lb (6.2 kg) with slide plate

Electrical

Rated frequency	50/60 Hz AC
Power supply	100 to 240 VAC $\pm 10\%$, 3.4 A to 1.4 A
Power consumption	268 W in ECO mode 363 W Normal mode
100 to 120 V	0.3 W Standby (Communication Off) 10 W Standby (Communication On)
220 to 240 V	0.3 W Standby (Communication Off) 12 W Standby (Communication On)

Environmental

Temperature	Operating: 32 to 95 °F (0 to 35 °C) Storage: 14 to 140 °F (-10 to 60 °C)
Humidity (non-condensing)	Operating: 20 to 80% RH
Operating altitude	0 to 7500 ft (0 to 2286 m); over 4921 ft (1500 m), enable High Altitude mode in the Extended menu (see page 67)

Pixelworks™ DNX™ ICs are used in this projector.

Compatible Video Formats

These projectors support the high definition video and computer display formats listed here.

To project images output from a computer, the computer's video card must be set at a refresh rate (vertical frequency) that's compatible with the projector. Some images are automatically resized using Epson's SizeWize™ technology to display in the projector's native format. The frequencies of some computers may not allow images to display correctly; see your computer's documentation for details.

B *Notices*

This appendix includes safety instructions and other important information about your projector.

Important Safety Instructions

Follow these safety instructions when setting up and using the projector:

- Do not look into the lens when the projector is on. The bright light can damage your eyes.
- Do not place the projector on an unstable cart, stand, or table.
- Do not operate the projector on its side, or while tilted to one side. Do not tilt the projector forward or back at a greater angle than that specified for keystone correction (see page 128).
- The projector should be installed by qualified technicians using mounting hardware designed for use with this projector.
- If you apply adhesives to the mount to prevent the screws from loosening, or if you use lubricants or oils on the projector, the projector case may crack and the projector may fall from its mount. This could cause serious injury to anyone under the mount and could damage the projector. When installing or adjusting the mount, do not use adhesives to prevent the screws from loosening and do not use oils or lubricants.
- Do not stand on the projector or place heavy objects on it.
- Do not use the projector where it may be exposed to rain, water, or excessive humidity.
- Unplug the projector from the wall outlet before cleaning. Use a dry cloth (or, for stubborn dirt or stains, a moist cloth that has been wrung dry) for cleaning. Do not use liquid or aerosol cleaners.
- Never spill liquid of any kind into the projector.
- Do not use the projector where it may be exposed to excessive dust or smoke.
- Never push objects of any kind through the cabinet slots.

- Do not use or store the projector or remote control in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle.
- Do not block the slots and openings in the projector case. They provide ventilation and prevent the projector from overheating. Do not operate the projector on a sofa, rug, or other soft surface, or set it on top of loose papers, which could block vents underneath your projector. If you are setting up the projector near a wall, leave at least 7.9 inches (20 cm) of space between the wall and the air exhaust vent.
- Do not operate the projector in a closed-in cabinet unless proper ventilation is provided.
- If you are using two or more projectors side-by-side, leave at least 2 feet (60 cm) of space between the projectors to allow for proper ventilation.
- You may need to clean the air filter and vent. A clogged air filter or vent can block ventilation needed to cool the projector.
- Do not store the projector outdoors for an extended length of time.
- Do not use the projector outside the required temperature range of 32 to 95 °F (0 to 35 °C). Doing so may cause an unstable display and could lead to projector damage.
- Do not store the projector outside the required temperature range of 14 to 140 °F (-10 to 60 °C) or in direct sunlight for long periods of time. Doing so may cause damage to the case.
- Do not touch the plug during an electrical storm. Otherwise, you may receive an electric shock.
- Unplug the projector when it will not be used for extended periods.
- Unplug the projector from the wall outlet and refer servicing to qualified service personnel under the following conditions: If it does not operate normally when you follow the operating instructions, or exhibits a distinct change in performance; If smoke, strange odors, or strange noises come from the projector; If the power cord or plug is damaged or frayed; If liquid or foreign objects get inside the projector, or if it has been exposed to rain or water; If it has been dropped or the housing has been damaged.
- Except as specifically explained in this *User's Guide*, do not attempt to service this product yourself. Refer all servicing to qualified personnel. Opening or removing covers may expose you to dangerous voltages and other hazards.
- Never open any covers on the projector except as specifically explained in this *User's Guide*. Never attempt to disassemble or modify the projector. Refer all repairs to qualified service personnel.

- Use the type of power source indicated on the projector. Use of a different power source may result in fire or electric shock. If you are not sure of the power available, consult your dealer or power company.
- If you use the projector in a country other than where you purchased it, use the correct power cord for that country.
- Do not overload wall outlets, extension cords, or power strips. Do not insert the plug into a dusty outlet. This can cause fire or electric shock.
- Take the following precautions when handling the plug: Do not hold the plug with wet hands. Do not insert the plug into an outlet with dust present. Insert the plug firmly into the outlet. Do not pull the power cord when disconnecting the plug; always be sure to hold the plug when disconnecting it. Failure to comply with these precautions could result in fire or electric shock.
- Do not place the projector where the cord can be walked on.
- ^(Hg) The lamp(s) in this product contain mercury. Please consult your state and local regulations regarding disposal or recycling. Do not put in the trash.
- Do not place anything that can become warped or damaged by heat near the exhaust vents. Do not bring your hands or face close to the vents while projection is in progress.
- Before you move the projector, make sure its power is turned off, the plug is disconnected from the outlet, and all cables are disconnected.
- Never try to remove the lamp immediately after use because it will be extremely hot. Before removing the lamp, turn off the power and wait at least an hour to allow the lamp to cool completely.
- Do not place the source of an open flame, such as a lit candle, on or near the projector.
- Do not modify the power cord. Do not place heavy objects on top of the power cord or bend, twist, or pull it excessively. Keep the power cord away from hot electrical appliances.
- If the lamp breaks, ventilate the room to prevent gases contained in the lamp from being inhaled or coming in contact with the eyes or mouth.
- If the projector is mounted overhead and the lamp breaks, be careful to prevent pieces of glass from falling into your eyes when you open the lamp cover.

WARNING: The cords included with this product contain chemicals, including lead, known to the State of California to cause birth defects or other reproductive harm. *Wash hands after handling.* (This notice is provided in accordance with Proposition 65 in Cal. Health & Safety Code §25249.5 and following.)

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

For Canadian Users

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

Software Notices

GNU GPL

This projector product includes the open source software programs which apply the GNU General Public License Version 2 or later version ("GPL Programs").

We provide the source code of the GPL Programs until five (5) years after the discontinuation of same model of this projector product.

If you desire to receive the source code of the GPL Programs, please contact the customer support of your region.

These GPL Programs are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

The GNU General Public License Version 2 is as follows. You also can see the GNU General Public License Version 2 at <http://www.gnu.org/license/>.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
 - a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
 - b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
 - c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
'Gnomovision' (which makes passes at compilers) written by James Hacker.
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU GPL

This projector product includes the open source software programs which apply the GNU Lesser General Public License Version 2 or later version ("LGPL Programs").

We provide the source code of the LGPL Programs until five (5) years after the discontinuation of same model of this projector product.

If you desire to receive the source code of the LGPL Programs, please contact the customer support of your region.

These LGPL Programs are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

The list of LGPL Programs is as follows and the names of author are described in the source code of the LGPL Programs.

LGPL Programs

uClibc-0.9.29

SDL-1.2.13

The GNU Lesser General Public License Version 2 is as follows. You also can see the GNU Lesser General Public License Version 2 at <http://www.gnu.org/license/>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages—typically libraries—of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:
 - a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
 - b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.
8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.
10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.
11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.

libjpeg

This projector product includes the open source software program "libjpeg" which applies the terms and conditions provided by owner of the copyright to the "libjpeg".

The "libjpeg" are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

List of libjpeg programs

libjpeg-6b

License terms of conditions of each program which are provided by owner of the copyright to the "libjpeg" are as follows.

Copyright (C) 1994-1997, Thomas G. Lane. This file is part of the Independent JPEG Group's software. For conditions of distribution and use, see the accompanying README file.

This distribution contains the sixth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under **LEGAL ISSUES**, below.

LEGAL ISSUES

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

- (1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.
- (2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".
- (3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprises of Menlo Park, CA. ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation but is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltconfig, ltmain.sh). Another support script, install-sh, is copyright by M.I.T. but is also freely distributable.

It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. (Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it.) So far as we are aware, there are no patent restrictions on the remaining code.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that

"The Graphics Interchange Format(c) is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."

Simon-Pierre Cadieux

Eric S. Raymond

Gilles Vollant

and with the following additions to the disclaimer:

There is no warranty against interference with your enjoyment of the library or against infringement. There is no warranty that our efforts or the library will fulfill any of your particular purposes or needs. This library is provided with all faults, and the entire risk of satisfactory quality, performance, accuracy, and effort is with the user.

libpng versions 0.97, January 1998, through 1.0.6, March 20, 2000, are Copyright (c) 1998, 1999 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-0.96, with the following individuals added to the list of Contributing Authors:

Tom Lane
Glenn Randers-Pehrson
Willem van Schaik

libpng versions 0.89, June 1996, through 0.96, May 1997, are Copyright (c) 1996, 1997 Andreas Dilger Distributed according to the same disclaimer and license as libpng-0.88, with the following individuals added to the list of Contributing Authors:

John Bowler
Kevin BraceySam Bushell
Sam Bushell
Magnus Holmgren
Greg Roelofs
Tom Tanner

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995, 1996 Guy Eric Schalnat, Group 42, Inc.

For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals:

Andreas Dilger
Dave Martindale
Guy Eric Schalnat
Paul Schmidt
Tim Wegner

The PNG Reference Library is supplied "AS IS". The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.
2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.
3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

A "png_get_copyright" function is available, for convenient use in "about" boxes and the like:

```
printf("%s",png_get_copyright(NULL));
```

Also, the PNG logo (in PNG format, of course) is supplied in the files "pngbar.png" and "pngbar.jpg" (88x31) and "pngnow.png" (98x31).

Libpng is OSI Certified Open Source Software. OSI Certified Open Source is a certification mark of the Open Source Initiative.

L. Peter Deutsch ghost@aladdin.com

Independent implementation of MD5 (RFC 1321).

This code implements the MD5 Algorithm defined in RFC 1321, whose text is available at

<http://www.ietf.org/rfc/rfc1321.txt>

The code is derived from the text of the RFC, including the test suite (section A.5) but excluding the rest of Appendix A. It does not include any code or documentation that is identified in the RFC as being copyrighted.

The original and principal author of md5.h is L. Peter Deutsch <ghost@aladdin.com>. Other authors are noted in the change history that follows (in reverse chronological order):

2002-04-13 lpd Removed support for non-ANSI compilers; removed references to Ghostscript; clarified derivation from RFC 1321; now handles byte order either statically or dynamically.

1999-11-04 lpd Edited comments slightly for automatic TOC extraction.

1999-10-18 lpd Fixed typo in header comment (ansi2knr rather than md5); added conditionalization for C++ compilation from Martin Purschke <purschke@bnl.gov>.

1999-05-03 lpd Original version.

ncurses

This projector product includes the open source software program "ncurses" which applies the terms and conditions provided by owner of the copyright to the "ncurses". The "ncurses" are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

List of "mDNSResponder"

mDNSResponder-107.6 (only mDNSResponderPosix is used)

License terms "Apache License Version 2.0, January 2004" are as follows.

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
